Tectonophysics, 200 (1991) 347–375
Elsevier Science Publishers B.V., Amsterdam

SUBJECT INDEX

Tectonophysics Volumes 191–200

absolute age *see also* isotopes

absolute age—dates
alkali basalts: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180
calcite: Palaeoseismicity from karst sediments; the "Grotta del Cervo" cave case study (central Italy)
(Postpischl, D., *et al.*) 193(1-3): 33-44
metamorphic rocks: Middle Paleocene terrane juxtaposition along the Median Tectonic Line, Southwest Japan; evidence from $^{40}Ar/^{39}Ar$ mineral ages
(Dallmeyer, R. D., *et al.*) 200(1-3): 281-297
sediments: Geological evidence for the last two faulting events on the North Anatolian fault zone in the Mudurnu Valley, western Turkey
(Ikeda, Yasutaka, *et al.*) 193(4): 335-345
shells: High-resolution ^{14}C dating of uplifted Holocene shoreline in eastern Saudi Arabia
(Vita-Finzi, C., *et al.*) 194(3): 197-201

acoustical surveys *see under* geophysical surveys *under* data processing

Aden gulf *see* Gulf of Aden

aeromagnetic surveys *see* magnetic surveys *under* geophysical surveys *under* Arctic Ocean; Nigeria; Pacific Ocean; Red Sea; Sardinia; Spain; Turkey

Afars and Issas Territory *see* Djibouti

Afghanistan—tectonophysics
crust: Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268

Africa *see also* Algeria; Angola; Congo; Djibouti; Egypt; Kenya; Malawi; Morocco; Namibia; Nigeria; South Africa; Sudan; Tunisia; Zaire

Africa—geomorphology
fluvial features: Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin
(Deffontaines, B., *et al.*) 194(3): 237-263

Africa—structural geology
structural analysis: Fractal analysis of fracturing in two African regions, from satellite imagery to ground scale
(Vignes-Adler, Michele, *et al.*) 196(1-2): 69-86

Africa—tectonophysics
crust: The Afro-Arabian rift system; an overview
(Girdler, R. W.) 197(2-4): 139-153
— The gravity field of the Red Sea and East Africa
(Makris, Jannis, *et al.*) 198(2-4): 369-381
isostasy: Continental rift structures and dynamics with reference to teleseismic studies of the Rio Grande and East African rifts
(Davis, Paul M.) 197(2-4): 309-325
plate tectonics: A synthesis of the structural geology of a major tectonic boundary between a 1000 m.y. mobile belt and a 3000 m.y. craton
(Van Bever Donker, J. M.) 196(3-4): 359-370
— Crustal structure and tectonic evolution of the Anza Rift, northern Kenya
(Greene, L. C., *et al.*) 197(2-4): 203-211
— Two-stage model of African absolute motion during the last 30 million years
(Pollitz, Fred F.) 194(1-2): 91-106

Alaska—seismology
earthquakes: Seismotectonics of intermediate-depth earthquakes from properties of aftershock sequences
(Kisslinger, C., *et al.*) 197(1): 27-40

Alberta—structural geology
faults: Out-of-sequence thrusting at the leading edge of the McConnell Thrust, front ranges of the Rocky Mountains of Alberta, Canada
(Maurel, L. E.) 191(3-4): 428

Algeria—seismology
earthquakes: Problems regarding the investigation of the 1790 Oran seismic period
(Lopez Marinas, J. M., *et al.*) 193(1-3): 237-239
— The Algerian earthquake of 24 June 1910; a case history
(Ambraseys, N. N., *et al.*) 193(1-3): 205-213

alkali basalts *see under* igneous rocks

Alps *see also* the individual countries

Alps—engineering geology
earthquakes: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183
geologic hazards: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183

Alps—geophysical surveys
seismic surveys: Spectral matrix filtering applied to explosion seismology data; examples from the Western Alps
(Nicollin, Florence) 195(2-4): 299-309

Alps—structural geology
deformation: Deformation and metamorphism during subduction and obduction of layered peridotites from the Alpine Piemonte ophiolite nappe
(Vogler, W. S.) 191(3-4): 445
— Deformation and recrystallization mechanisms in naturally deformed omphacites from the Sesia-Lanzo Zone; geophysical consequences
(Buatier, M., *et al.*) 195(1): 11-27
— Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198
— Obduction-induced deformation in the footwall of the early Alpine Suture, Penninic Realm, northern Italy
(Vogler, W. S.) 191(3-4): 444
faults: Mesoscopic faults in the Bregaglia (Bergell) Massif, Central Alps
(Passerini, P., *et al.*) 198(1): 53-72
fractures: Complete seismic properties obtained from microcrack fabrics and textures in an amphibolite from the Ivrea Zone, Western Alps, Italy
(Siegesmund, S., *et al.*) 199(1): 13-24

(Maurel, L. E.) 191(3-4): 428

Algeria—seismology
earthquakes: Problems regarding the investigation of the 1790 Oran seismic period
(Lopez Marinas, J. M., *et al.*) 193(1-3): 237-239
— The Algerian earthquake of 24 June 1910; a case history
(Ambraseys, N. N., *et al.*) 193(1-3): 205-213

alkali basalts *see under* igneous rocks

Alps *see also* the individual countries

Alps—engineering geology
earthquakes: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183
geologic hazards: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183

Alps—geophysical surveys
seismic surveys: Spectral matrix filtering applied to explosion seismology data; examples from the Western Alps
(Nicollin, Florence) 195(2-4): 299-309

Alps—structural geology
deformation: Deformation and metamorphism during subduction and obduction of layered peridotites from the Alpine Piemonte ophiolite nappe
(Vogler, W. S.) 191(3-4): 445
— Deformation and recrystallization mechanisms in naturally deformed omphacites from the Sesia-Lanzo Zone; geophysical consequences
(Buatier, M., *et al.*) 195(1): 11-27
— Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198
— Obduction-induced deformation in the footwall of the early Alpine Suture, Penninic Realm, northern Italy
(Vogler, W. S.) 191(3-4): 444
faults: Mesoscopic faults in the Bregaglia (Bergell) Massif, Central Alps
(Passerini, P., *et al.*) 198(1): 53-72
fractures: Complete seismic properties obtained from microcrack fabrics and textures in an amphibolite from the Ivrea Zone, Western Alps, Italy
(Siegesmund, S., *et al.*) 199(1): 13-24

0040-1951/91/$03.50 © 1991 – Elsevier Science Publishers B.V. All rights reserved

neotectonics: Stress field changes in the Rhone Valley from the Miocene to the present
(Bles, J. L., *et al.*) 194(3): 265-277
orogeny: Some constraints on the kinematics of the Tertiary Piemonte Basin (Northwest Italy)
(Hoogerduijn Strating, E. H., *et al.*) 198(1): 47-51

Alps—tectonophysics
crust: Relationships between the Alpine Suture and the Insubric Line in the Central Alps; structural, geochronological and geophysical evidence
(Heitzmann, P.) 191(3-4): 425
mantle: Some structural features of the Alpine lithospheric root
(Viel, L., *et al.*) 195(2-4): 421-436
paleomagnetism: Penninic windows at the eastern end of the Alps and their relation to the intra-Carpathian basins [discussion and reply]
(Marton, Emo, *et al.*) 194(1-2): 183-186

Andes *see also* the individual countries

Angola—geomorphology
fluvial features: Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin
(Deffontaines, B., *et al.*) 194(3): 237-263

Antarctica—geochemistry
crust: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358

Antarctica—tectonophysics
crust: Tectonic development of passive continental margins of the southern and central Red Sea with a comparison to Wilkes Land, Antarctica
(Bohannon, Robert G., *et al.*) 198(2-4): 129-154
plate tectonics: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358
— Plate subduction and related deformation; a 600 km crustal transect across the Antarctic Peninsula magmatic arc
(Storey, B. C., *et al.*) 191(3-4): 443

Apennines—geomorphology
mud volcanoes: Earthquake forerunners in a selected area of northern Italy; recent developments in automatic geochemical monitoring
(Martinelli, G., *et al.*) 193(4): 397-410

Apennines—structural geology
orogeny: Some constraints on the kinematics of the Tertiary Piemonte Basin (Northwest Italy)
(Hoogerduijn Strating, E. H., *et al.*) 198(1): 47-51
— The overprint of the Alpine tectono-metamorphic evolution on the Hercynian Orogen; an example from the Apuane Alps (Northern Apennines, Italy)
(Conti, P., *et al.*) 191(3-4): 335-346

Appalachians *see also* the individual states and provinces

Appalachians—structural geology
deformation: Fluid evolution history of brittle-ductile shear zones on the hanging wall of Yellow Spring Thrust, Valley and Ridge Province, Pennsylvania, U.S.A.
(Srivastava, D. C., *et al.*) 198(1): 23-34
folds: Interactive property of large thrust sheets with footwall rocks; the subthrust interactive duplex hypothesis; a mechanism of dome formation in thrust sheets
(Hatcher, Robert D., Jr.) 191(3-4): 237-242

Arabian Peninsula *see also* Saudi Arabia; Yemen

Arabian Sea *see also* Gulf of Aden

Arabian Sea—tectonophysics
crust: Definition of the continent-ocean boundary of India and the surrounding oceanic regions from Magsat data
(Singh, B. P., *et al.*) 192(1-2): 145-151

Arctic Ocean—geophysical surveys
magnetic surveys: Interpretation of depth to the magnetic basement in the northern Barents Sea (south of Svalbard)
(Skilbrei, Jan Reidar) 200(1-3): 127-141
maps: Interpretation of depth to the magnetic basement in the northern Barents Sea (south of Svalbard)
(Skilbrei, Jan Reidar) 200(1-3): 127-141

Arctic Ocean—tectonophysics
crust: Interpretation of depth to the magnetic basement in the northern Barents Sea (south of Svalbard)
(Skilbrei, Jan Reidar) 200(1-3): 127-141

Arctic region *see also* the individual countries; Greenland

Arizona—tectonophysics
crust: Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354

Asia *see also* Afghanistan; China; Himalayas; India; Iran; Japan; Korea; Malaysia; Taiwan; Vietnam

Asia—structural geology
maps: Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268

Asia—tectonophysics
plate tectonics: Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268

Atlantic Ocean *see also* North Sea

Atlantic Ocean—oceanography
ocean floors: Clay diapiric structures within the strike-slip margin of the southern leg of the Barbados prism
(Griboulard, R., *et al.*) 192(3-4): 383-400

Atlantic Ocean—seismology
earthquakes: Periodicity in seismicity; examination of four catalogs
(Lindholm, Conrad D., *et al.*) 191(1-2): 155-164

Atlantic Ocean—tectonophysics
heat flow: The thermal regime in the Jeanne d'Arc Basin, offshore Eastern Canada
(Correia, Antonio, *et al.*) 194(4): 357-361
sea-floor spreading: Early Cretaceous extension in Northeast Brazil related to the South Atlantic opening
(Senant, Jacques, *et al.*) 198(1): 35-46
— The tectonic evolution of the South Atlantic from Late Jurassic to present
(Nurnberg, Dirk, *et al.*) 191(1-2): 27-53

Atlantic Ocean Islands *see also* Iceland

Atlantic region *see also* the individual countries

Atlantic region—tectonophysics
plate tectonics: Collision deformation across the Iapetus suture zone observed from deep-seismic reflection profiles
(Freeman, B., *et al.*) 191(3-4): 418

Australasia *see also* New Zealand

Australia *see also* Queensland; Victoria; Western Australia

Australia—oceanography
continental margin: A two-dimensional interpretation of the geomagnetic coast effect of Southeast Australia, observed on land and seafloor
(Kellett, R. L., *et al.*) 192(3-4): 367-382

Australia—tectonophysics
crust: Xenolith geotherms and crustal models in eastern Australia
(Cull, J. P., *et al.*) 192(3-4): 359-366
heat flow: Xenolith geotherms and crustal models in eastern Australia
(Cull, J. P., *et al.*) 192(3-4): 359-366
plate tectonics: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358

Austria—structural geology
faults: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232

automatic data processing *see* data processing

Azores *see also* Portugal

Baltic region *see also* the individual countries

Barbados—tectonophysics
plate tectonics: Clay diapiric structures within the strike-slip margin of the southern leg of the Barbados prism
(Griboulard, R., *et al.*) 192(3-4): 383-400

basalts *see under* igneous rocks

batholiths *see under* intrusions

Belgium—seismology
earthquakes: The seismic cataclysm of 29 March 1000; genesis of a mistake
(Alexandre, Pierre) 193(1-3): 45-52

Belgium—structural geology
faults: Meso-Cenozoic faulting and inferred palaeostresses in the Mons Basin, Belgium
(Vandycke, S., *et al.*) 192(3-4): 261-271

Bering Sea—tectonophysics
sea-floor spreading: The Komandorsky Basin as a product of spreading behind a transform plate boundary
(Baranov, B. V., *et al.*) 199(2-4): 237-269

book reviews—areal geology
title: Geology of the higher central Himalaya [book review]
(Klootwijk, Chris) 200(1-3): 337-338
— The geological evolution of Tibet [book review]
(Gansser, Augusto) 200(1-3): 334-337

book reviews—extraterrestrial geology
title: The structure of the planets [book review]
(Lowman, Paul D., Jr.) 194(1-2): 195-196

book reviews—general
title: Interpretation of geological maps [book review]
(Jordan, P. G.) 196(1-2): 209-210

book reviews—geophysics
title: Geophysical theory [book review]
(Tango, Gerardo G.) 199(1): 134-136
— Phase transitions in ferroelastic and co-elastic crystals [book review]
(Frey, F.) 200(1-3): 342-344
— Thermal geophysics [book review]
(Robson, Geoffrey R.) 200(1-3): 338-339

book reviews—sedimentary petrology
title: New perspectives in basin analysis [book review]
(Embry, A. F.) 200(1-3): 340-341

book reviews—seismology
title: Earthquake prediction; present status [book review]
(Rikitake, T.) 200(1-3): 333-334
— Scattering and attenuation of seismic waves; Part II [book review]
(Peacock, Sheila) 199(1): 133-134

book reviews—structural geology
title: Geological structures and maps [book review]
(Jordan, P. G.) 194(1-2): 196
— The Macmillan field guide to geological structures [book review]
(Collinson, John D.) 200(1-3): 339-340

book reviews—tectonophysics
title: Mountains under the sea; expansion of the oceans and plate tectonics; book review
(Boullier, Anne-Marie) 200(1-3): 334

Brazil—geophysical surveys
surveys: Geophysical constraints on tectonic models of the Taubate Basin, southeastern Brazil
(Padilha, A. L., *et al.*) 196(1-2): 157-172

Brazil—tectonophysics
crust: Early Cretaceous extension in Northeast Brazil related to the South Atlantic opening
(Senant, Jacques, *et al.*) 198(1): 35-46
plate tectonics: The central Brazil pop-up; an example of double ancient oblique continental collision
(Costa, J. B. S., *et al.*) 191(3-4): 412-413

British Columbia—tectonophysics
crust: Deformations of the Juan de Fuca–North American plate boundary
(Yokokura, T., *et al.*) 191(3-4): 446

California—petrology
intrusions: Emplacement and deformation of granitoids during volcanic arc construction in the Foothills Terrane, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 191(1-2): 89-110

California—stratigraphy
Jurassic: Concordant paleolatitudes from ophiolite sequences in the Northern California Coast Ranges, U.S.A.
(Mankinen, Edward A., *et al.*) 198(1): 1-21

California—structural geology
deformation: Strains and structures associated with a terrane bounding stretching fault; the Melones fault zone, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 194(1-2): 69-90

California—tectonophysics
plate tectonics: Relationships between kinematics of arc–continent collision and kinematics of thrust faults, folds, shear zones, and foliations in the Nevadan Orogen, northern Sierra Nevada, California
(Edelman, Steven H.) 191(3-4): 223-236

Canada *see also* Alberta; Appalachians; British Columbia; Canadian Shield; Northwest Territories; Quebec; Rocky Mountains

Canada—tectonophysics
crust: Downward continuation of heat flow density data and thermal regime in Eastern Canada
(Mareschal, Jean-Claude) 194(4): 349-356
— The Canadian aeromagnetic database; evolution and applications to the definition of major crustal boundaries
(Teskey, D. J., *et al.*) 192(1-2): 41-56
— The thermal regime in the Jeanne d'Arc Basin, offshore Eastern Canada
(Correia, Antonio, *et al.*) 194(4): 357-361
maps: The Canadian aeromagnetic database; evolution and applications to the definition of major crustal boundaries
(Teskey, D. J., *et al.*) 192(1-2): 41-56

Canadian Shield—tectonophysics
crust: Seismic reflection trace synthesized from Proterozoic outcrop and its correlation to seismic profiles in northwestern Canada
(Cook, Frederick A., *et al.*) 191(1-2): 111-126

heat flow: Downward continuation of heat flow density data and thermal regime in Eastern Canada
(Mareschal, Jean-Claude) 194(4): 349-356
maps: The Canadian aeromagnetic database; evolution and applications to the definition of major crustal boundaries
(Teskey, D. J., *et al.*) 192(1-2): 41-56
paleomagnetism: Magnetic expressions of intrusions including magnetic aureoles
(Schwarz, Erik J.) 192(1-2): 191-200

Carboniferous *see also under* stratigraphy *under* China

Caribbean region *see also* the individual countries

Caribbean region—tectonophysics
plate tectonics: Geologic evaluation of plate kinematic models for the North American-Caribbean plate boundary zone
(Heubeck, Christoph, *et al.*) 191(1-2): 1-26
— North Caribbean neotectonic events; the Trans-Haitian fault system; Tertiary record of an oblique transcurrent shear zone uplifted in Hispaniola
(Pubellier, M., *et al.*) 194(3): 217-236

Carpathians *see also* the individual countries

Carpathians—tectonophysics
crust: Evolution of the stress fields in the Carpatho-Pannonian area during the Neogene
(Csontos, L., *et al.*) 199(1): 73-91
— Tectonic nappes and horizontal layering of the Earth's crust in the Mediterranean Belt (Carpathians, Balkanides and Caucasus)
(Gamkrelidze, I. P.) 196(3-4): 385-396

catalogs—engineering geology
soil mechanics: Soil liquefaction; case histories in Italy
(Berardi, R., *et al.*) 193(1-3): 141-164

catalogs—stratigraphy
paleomagnetism: Catalogue of palaeomagnetic directions and poles from Fennoscandia; Archaean to Tertiary
(Pesonen, L. J., *et al.*) 195(2-4): 151-207

Cenozoic *see also under* stratigraphy *under* Tunisia

changes of level *see also under* stratigraphy *under* Saudi Arabia

China—oceanography
continental margin: Meso–Cenozoic taphrogeny and dispersion in the continental margin of Southeast China and adjacent seas
(Qiu Yuanxi, *et al.*) 197(2-4): 257-269

China—seismology
earthquakes: A simplified hypocenter model based on the multi-criterion principle for strong earthquakes
(Wang Shengzu) 197(1): 73-87
— Inversion of near-source-broadband accelerograms for the earthquake source-time function
(Chen, Y. T., *et al.*) 197(1): 89-98
— Spatial variations in seismicity on the eastern Chinese mainland
(Fu Zhengxiang) 193(4): 291-298

China—stratigraphy
Carboniferous: Paleomagnetic results from the Upper Carboniferous of the Shan-Thai-Malay Block of western Yunnan, China
(Huang Kainian, *et al.*) 192(3-4): 333-344
Jurassic: Paleomagnetism of Jurassic rocks from southwestern Sichuan and the timing of the closure of the Qinling Suture
(Huang Kainian, *et al.*) 200(1-3): 299-316
Paleozoic: Paleoclimatic and paleomagnetic constraints on the Paleozoic reconstructions of South China, North China and Tarim
(Nie Shangyou) 196(3-4): 279-308

China—structural geology
neotectonics: Extensional development of Gabo Valley, southern Tibet
(Burchfiel, B. C., *et al.*) 194(1-2): 187-193
tectonics: Timing and spatial distribution of rifting in China
(Gilder, Stuart A., *et al.*) 197(2-4): 225-243

China—tectonophysics
crust: A preliminary description of the Gan-Hang failed rift, southeastern China
(Goodell, P. C., *et al.*) 197(2-4): 245-255
— Meso–Cenozoic taphrogeny and dispersion in the continental margin of Southeast China and adjacent seas
(Qiu Yuanxi, *et al.*) 197(2-4): 257-269

clastic rocks *see under* sedimentary rocks

clay mineralogy—experimental studies
magnetic susceptibility: The magnetic fabrics of experimentally deformed artificial clay–water dispersions
(Richter, Carl, *et al.*) 200(1-3): 143-155

cleavage *see under* style *under* foliation

climate, ancient *see* paleoclimatology

Colorado Plateau *see also* the individual states

Colorado Plateau—geophysical surveys
heat flow: Heat flow on the southern Colorado Plateau
(Minier, Jeffrie, *et al.*) 200(1-3): 51-66

Colorado Plateau—petrology
magmas: Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354

Columbia Plateau *see also* the individual states

Congo—geomorphology
fluvial features: Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin
(Deffontaines, B., *et al.*) 194(3): 237-263

congresses *see* symposia

continental drift *see also* plate tectonics; sea-floor spreading

continental drift—evolution
models: Two-stage model of African absolute motion during the last 30 million years
(Pollitz, Fred F.) 194(1-2): 91-106
reconstruction: The tectonic evolution of the South Atlantic from Late Jurassic to present
(Nurnberg, Dirk, *et al.*) 191(1-2): 27-53

continental drift—Gondwana
Antarctica: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358
China: Paleoclimatic and paleomagnetic constraints on the Paleozoic reconstructions of South China, North China and Tarim
(Nie Shangyou) 196(3-4): 279-308

continental drift—Tethys
Asia: Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268
regional: Collision and rifting in the Tethys Ocean; geodynamic implications
(Kazmin, V. G.) 196(3-4): 371-384

continental margin *see also under* oceanography *under* Australia; China

Corsica—petrology
intrusions: Genesis of a Variscan batholith; field, petrological and mineralogical evidence from the Corsica–Sardinia Batholith
(Rossi, Philippe, *et al.*) 195(2-4): 319-346

crust *see also under* geochemistry *under* Antarctica; Germany; *see also under* tectonophysics *under* Afghanistan; Africa; Alps; Antarctica; Arabian Sea; Arctic Ocean; Arizona; Australia; Brazil; British Columbia; Canada; Canadian Shield; Carpathians; China; data processing; Djibouti; Europe; Germany; Gulf of Aden; India; Indian Ocean; Iran; Italy; Japan; Kenya; Mediterranean region; Mexico; Namibia; New Mexico; Nigeria; North America; North Sea; Pacific Ocean; Red Sea; Red Sea region; Saudi Arabia; Scandinavia; South Africa; South America; Southern U.S.; Spain; Sudan; Sweden; symposia; Taiwan; USSR; Washington; Western Australia; Yemen

crust—observations

gravity anomalies: Constraints on the usefulness of gravimetry for detecting precursory crustal deformations
(Lambert, A., *et al.*) 193(4): 369-375

crust—processes

heat flow: A heat production model of the crust and upper mantle
(Cermak, Vladimir, *et al.*) 194(4): 307-323

crust—properties

elastic properties: The effect of plagioclase textures on velocity anisotropy and shear wave splitting at deeper crustal levels
(Siegesmund, S., *et al.*) 191(1-2): 147-154

magnetic properties: Magnetic anomalies at satellite altitude over continent-ocean boundaries
(Hayling, Kjell L.) 192(1-2): 129-143

— Mean magnetic contrasts between oceans and continents
(Hinze, W. J., *et al.*) 192(1-2): 117-127

— Thermoremanent magnetization of the oceanic lithosphere inferred from a thermal evolution model; implications for the source of marine magnetic anomalies
(Arkani-Hamed, J.) 192(1-2): 81-96

mechanical properties: A two-level concept of plate tectonics; application to geodynamics
(Lobkovsky, L. I., *et al.*) 199(2-4): 343-374

— Backarc extension versus continental breakup; petrological aspects for active rifting
(Tatsumi, Yoshiyuki, *et al.*) 197(2-4): 127-137

— Crustal mesoplate tectonics; deformation in continental interiors during collisional orogeny
(Phipps, S. P.) 191(3-4): 436

— Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198

— Ridge push and associated plate interior stress in normal and hot spot regions
(Bott, M. H. P.) 200(1-3): 17-32

thermomechanical properties: Lithospheric thinning, uplift, and heat flow preceding rifting
(Mareschal, Jean-Claude, *et al.*) 197(2-4): 117-126

crystal chemistry *see also* crystal growth

crystal growth—chain silicates, clinopyroxene

omphacite: Deformation and recrystallization mechanisms in naturally deformed omphacites from the Sesia-Lanzo Zone; geophysical consequences
(Buatier, M., *et al.*) 195(1): 11-27

crystal structure *see also* crystal growth

dams *see also* reservoirs

data processing—geophysical surveys

acoustical surveys: Periodicity in the accretion process on the Southeast Indian Ridge at 27°40'S
(Sauter, D., *et al.*) 195(1): 47-64

data processing—maps

aeromagnetic maps: The Canadian aeromagnetic database; evolution and applications to the definition of major crustal boundaries
(Teskey, D. J., *et al.*) 192(1-2): 41-56

data processing—seismology

earthquakes: Some ideas for a databank of macroseismic data
(Postpischl, D., *et al.*) 193(1-3): 215-223

elastic waves: Inversion of seismological data using a controlled random search global optimization technique
(Shanker, K., *et al.*) 198(1): 73-80

data processing—stratigraphy

paleomagnetism: Catalogue of palaeomagnetic directions and poles from Fennoscandia; Archaean to Tertiary
(Pesonen, L. J., *et al.*) 195(2-4): 151-207

data processing—structural geology

deformation: Determination of March strain from phyllosilicate preferred orientation; a semi-numerical method
(Chen, Richard T., *et al.*) 200(1-3): 173-185

neotectonics: A new digital method for analysis of neotectonics applied to the Bonnevaux-Chambaran area, France
(Colleau, A., *et al.*) 194(3): 295-305

data processing—tectonophysics

crust: Crustal-scale balanced cross sections through the Variscan fold belt, Germany; the central EGT-segment
(Behrmann, J., *et al.*) 196(1-2): 1-21

plate tectonics: Computer-aided calculation of plate movements through the TECCOMP stress analysis system
(Kampschuur, W., *et al.*) 191(3-4): 426

— Geologic evaluation of plate kinematic models for the North American-Caribbean plate boundary zone
(Heubeck, Christoph, *et al.*) 191(1-2): 1-26

deformation *see also* structural analysis

deformation—experimental studies

creep: The effect of porosity on the strength of quartz aggregates experimentally deformed in the dislocation creep regime
(Hirth, Greg, *et al.*) 200(1-3): 97-110

strain: On the origin of the magnetic fabric in purple Cambrian slates of North Wales
(Jackson, Mike, *et al.*) 194(1-2): 49-58

— The magnetic fabrics of experimentally deformed artificial clay–water dispersions
(Richter, Carl, *et al.*) 200(1-3): 143-155

ultrastructure: Deformation and recrystallization mechanisms in naturally deformed omphacites from the Sesia-Lanzo Zone; geophysical consequences
(Buatier, M., *et al.*) 195(1): 11-27

— Experimental deformation of a glassy basalt
(Hacker, Bradley R., *et al.*) 200(1-3): 79-96

deformation—field studies

brittle deformation: Mesoscopic faults in the Bregaglia (Bergell) Massif, Central Alps
(Passerini, P., *et al.*) 198(1): 53-72

cataclasis: Initiation of cataclastic flow and development of cataclastic foliation in nonporous quartzites from a natural fault zone
(Babaie, Hassan A., *et al.*) 200(1-3): 67-77

shear: Continuous deformation, ductile thrusting and backfolding of cover and basement in the Sierra de Guadarrama, Hercynian Orogen of central Spain
(Macaya, J., *et al.*) 191(3-4): 291-309

— Ductile deformation and Miocene nappe-stacking in Taiwan related to motion of the Philippine Sea Plate
(Faure, M., *et al.*) 198(1): 95-105

— Extensional tectonics of the Toledo ductile–brittle shear zone, central Iberian Massif
(Hernandez Enrile, J. L.) 191(3-4): 311-324

— Fluid evolution history of brittle-ductile shear zones on the hanging wall of Yellow Spring Thrust, Valley and Ridge Province, Pennsylvania, U.S.A.
(Srivastava, D. C., *et al.*) 198(1): 23-34
— Geometry of a middle Proterozoic extensional decollement in northeastern Australia
(Holcombe, R. J., *et al.*) 191(3-4): 255-274
— Indosinian dextral ductile fault system and synkinematic plutonism in the southwest of the Ogcheon Belt (South Korea)
(Cluzel, D., *et al.*) 194(1-2): 131-151
shear strain: Horizontal deformation in the Cascadia subduction zone as derived from serendipitous geodetic data
(Snay, Richard A., *et al.*) 194(1-2): 59-67
shear stress: Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198
strain: Finite strain analysis in a transpressive regime (Variscan Autochthon, Northeast Portugal)
(Dias, R., *et al.*) 191(3-4): 389-397
— Strains and structures associated with a terrane bounding stretching fault; the Melones fault zone, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 194(1-2): 69-90
stress: Evolution of the stress fields in the Carpatho-Pannonian area during the Neogene
(Csontos, L., *et al.*) 199(1): 73-91
— Plane stress and plane strain fracture in Eocene chalks around Beer Sheva
(Bahat, D.) 196(1-2): 61-67
— Stress field changes in the Rhone Valley from the Miocene to the present
(Bles, J. L., *et al.*) 194(3): 265-277

deformation—theoretical studies
brittle deformation: An application of the slip model of brittle deformation to focal mechanism analysis in three different plate tectonic situations
(Capote, R., *et al.*) 191(3-4): 399-409
shear stress: Factors controlling slip-lineation orientation on thrust-fault planes
(Wilkerson, M. Scott, *et al.*) 196(1-2): 203-208
— Paleostress inversion of fault-slip data using the shear stress solution of Means (1989)
(Fleischmann, Karl H., *et al.*) 196(1-2): 195-202
strain: Determination of March strain from phyllosilicate preferred orientation; a semi-numerical method
(Chen, Richard T., *et al.*) 200(1-3): 173-185
— The use of syntectonic fibres to determine strain estimates and deformation paths; an appraisal
(Spencer, Sara) 194(1-2): 13-34

diagenesis *see also* sedimentation

diastrophism *see* orogeny

dikes *see under* intrusions

diorites *see under* igneous rocks

Djibouti—tectonophysics
crust: Evolution of eastern Afar and the Gulf of Tadjura
(Clin, M.) 198(2-4): 355-368

domes *see under* style *under* folds

Earth—interior
evolution: Planetary evolution and global tectonics
(Monin, A. S.) 199(2-4): 149-164

earthquakes *see under* geologic hazards; seismology; *see also* seismology; *see also under* engineering geology *under* Alps; Italy; *see also under* seismology *under* Alaska; Algeria; Atlantic Ocean; Belgium; China; data processing; Europe; Greece; Himalayas; Hungary; Idaho; India; Italy; Japan; Kenya; Korea; Norway; Portugal; Red Sea; Spain; symposia; Taiwan; Turkey; USSR; Vietnam; Yellow Sea

earthquakes—aftershocks
focal mechanism: Minimum size of earthquakes and minimum value of dynamic rupture velocity
(Iio, Yoshihisa) 197(1): 19-25
seismotectonics: Seismotectonics of intermediate-depth earthquakes from properties of aftershock sequences
(Kisslinger, C., *et al.*) 197(1): 27-40
spectral analysis: Inversion of near-source-broadband accelerograms for the earthquake source-time function
(Chen, Y. T., *et al.*) 197(1): 89-98

earthquakes—focal mechanism
fault planes: An application of the slip model of brittle deformation to focal mechanism analysis in three different plate tectonic situations
(Capote, R., *et al.*) 191(3-4): 399-409
— Analysis and interpretation of the heterogeneous rupture process; application of the empirical Green's function method and nonlinear inversion technique to large earthquakes
(Fukuyama, Eiichi) 197(1): 1-17
induced earthquakes: How geology can influence scaling relations
(Feignier, Bruno) 197(1): 41-53
models: Modelling the earthquake source
(Scholz, C. H., *et al.*) 197(1): 1-98

earthquakes—focus
inverse problem: Inversion of seismological data using a controlled random search global optimization technique
(Shanker, K., *et al.*) 198(1): 73-80
numerical models: A simplified hypocenter model based on the multi-criterion principle for strong earthquakes
(Wang Shengzu) 197(1): 73-87

earthquakes—genesis
subduction zones: Analysis of seismotectonic processes in subduction zones from the standpoint of a keyboard model of great earthquakes
(Lobkovsky, L. I., *et al.*) 199(2-4): 211-236

earthquakes—prediction
precursors: Constraints on the usefulness of gravimetry for detecting precursory crustal deformations
(Lambert, A., *et al.*) 193(4): 369-375
— Earthquake prediction
(Wyss, Max) 193(4): 253-410
— Pore-pressure variation as a precursory phenomenon; the need for and a list of supplementary data
(Kumpel, H. J.) 193(4): 377-383
statistical analysis: Structure of optimal strategies in earthquake prediction
(Molchan, George M.) 193(4): 267-276
time variations: Seismicity rate variations and systematic changes in magnitudes in teleseismic catalogs
(Habermann, Ray E.) 193(4): 277-289

Eastern Hemisphere *see also* Africa; Antarctica; Arctic Ocean; Asia; Atlantic Ocean; Europe; Indian Ocean; USSR

Eastern U.S. *see also* Georgia; Pennsylvania

Egypt—petrology
intrusions: Granite magmatism in the East Saharan Craton initiated by arc-continent collision in the Nubian Shield
(Harms, U.) 191(3-4): 424
— Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201

elastic waves *see under* seismology

engineering geology *see also* deformation; earthquakes; geodesy; geologic hazards; geophysical methods; ground water; reservoirs; rock mechanics; soil mechanics

environmental geology *see also* geologic hazards
epeirogeny *see also* orogeny
eruptive rocks *see* igneous rocks
Europe *see also* Alps; Austria; Belgium; Carpathians; France; Germany; Greece; Hungary; Iceland; Norway; Portugal; Scandinavia; Spain; Sweden; Switzerland; Wales; Yugoslavia
Europe—geophysical surveys
gravity surveys: The EGT Bouguer gravity compilation (Klingele, Emile, *et al.*) 195(2-4): 437-441
maps: The EGT Bouguer gravity compilation (Klingele, Emile, *et al.*) 195(2-4): 437-441
surveys: The European Geotraverse, Part 7 (Freeman, R., *et al.*) 195(2-4): 105-446
Europe—petrology
igneous rocks: A model of granitic melt formation by frictional heating on shear planes (Frischbutter, Alexander, *et al.*) 194(1-2): 1-11
Europe—seismology
earthquakes: Investigation of historical earthquakes in Europe (Stucchi, M., *et al.*) 193(1-3): 1-251
— The seismic cataclysm of 29 March 1000; genesis of a mistake (Alexandre, Pierre) 193(1-3): 45-52
Europe—structural geology
faults: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts (Schmidt, Thomas, *et al.*) 200(1-3): 213-232
Europe—tectonophysics
crust: Accretionary history and crustal evolution of the Variscan Belt in Western Europe (Matte, Philippe) 196(3-4): 309-337
— Crustal fracturing and intraplate tectonics in the area between the North Sea and the Alps; a comparison of Landsat-derived fractures with existing map data (Kronberg, Peter) 195(2-4): 261-269
— Crustal temperatures along the central segment of the European Geotraverse (Cermak, V., *et al.*) 195(2-4): 241-251
— Crustal thermal models along East European geotraverses; inverse solutions (Shen, P. Y., *et al.*) 194(4): 363-385
— Evolution of the stress fields in the Carpatho-Pannonian area during the Neogene (Csontos, L., *et al.*) 199(1): 73-91
— Magnetic anomaly pattern of Central Europe (Bosum, W., *et al.*) 195(2-4): 253-259
— Temperature field modelling along the northern segment of the European Geotraverse and the Danish transition zone (Baumann, Marlyse, *et al.*) 194(4): 387-407
— The European Geotraverse, Part 7 (Freeman, R., *et al.*) 195(2-4): 105-446
heat flow: Crustal temperatures along the central segment of the European Geotraverse (Cermak, V., *et al.*) 195(2-4): 241-251
— Crustal thermal models along East European geotraverses; inverse solutions (Shen, P. Y., *et al.*) 194(4): 363-385
plate tectonics: Accretionary history and crustal evolution of the Variscan Belt in Western Europe (Matte, Philippe) 196(3-4): 309-337
— Mesozoic and Tertiary plate tectonics in Central and Northwest Europe (Graversen, Ole) 191(3-4): 421
experimental studies *see under* clay mineralogy; deformation; fractures; tectonophysics; *see under* magnetic susceptibility *under* paleomagnetism
Far East *see also* the individual countries
faulting *see* faults
faults *see also* folds
faults—displacements
active faults: Multidisciplinary research on fault activity in the western part of the North Anatolian fault zone (Honkura, Yoshimori, *et al.*) 193(4): 347-357
decollement: Geometry of a middle Proterozoic extensional decollement in northeastern Australia (Holcombe, R. J., *et al.*) 191(3-4): 255-274
dip-slip faults: The effect of movement on high-angle faults on stratigraphy and structure; the Attico-Cycladic Massif, Greece (Avdis, Vaios) 192(3-4): 293-311
nappes: Crustal-scale balanced cross sections through the Variscan fold belt, Germany; the central EGT-segment (Behrmann, J., *et al.*) 196(1-2): 1-21
normal faults: Microseismic activity around the western extension of the 1967 Mudurnu Earthquake Fault (Iio, Y., *et al.*) 193(4): 327-334
reactivation: Extension structures as a precursor of thrust geometry (Deramond, J., *et al.*) 191(3-4): 414
— Geological evidence for the last two faulting events on the North Anatolian fault zone in the Mudurnu Valley, western Turkey (Ikeda, Yasutaka, *et al.*) 193(4): 335-345
— Interpretation of depth to the magnetic basement in the northern Barents Sea (south of Svalbard) (Skilbrei, Jan Reidar) 200(1-3): 127-141
— Lithospheric dynamics and the rapid Pliocene-Quaternary subsidence phase in the southern North Sea basin (Kooi, Henk, *et al.*) 192(3-4): 245-259
— Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin (Deffontaines, B., *et al.*) 194(3): 237-263
— Tertiary evolution of the Sivas Basin, central Turkey (Cater, J. M. L., *et al.*) 195(1): 29-46
strike-slip faults: Clay diapiric structures within the strike-slip margin of the southern leg of the Barbados prism (Griboulard, R., *et al.*) 192(3-4): 383-400
— Evolution of the stress fields in the Carpatho-Pannonian area during the Neogene (Csontos, L., *et al.*) 199(1): 73-91
— Geologic evaluation of plate kinematic models for the North American-Caribbean plate boundary zone (Heubeck, Christoph, *et al.*) 191(1-2): 1-26
— Geological interpretation of DEKORP deep seismic reflection profiles 1C and 9N across the Variscan Saar-Nahe Basin, Southwest Germany (Korsch, R. J., *et al.*) 191(1-2): 127-146
— Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts (Schmidt, Thomas, *et al.*) 200(1-3): 213-232
— Mesoscopic faults in the Bregaglia (Bergell) Massif, Central Alps (Passerini, P., *et al.*) 198(1): 53-72
— Strike-slip faulting in continental rifts; examples from Sabukia, East Africa (1928), and other regions (Doser, Diane Irene, *et al.*) 197(2-4): 213-224
thrust faults: Continuous deformation, ductile thrusting and backfolding of cover and basement in the Sierra de Gua-

darrama, Hercynian Orogen of central Spain
(Macaya, J., *et al.*) 191(3-4): 291-309
— Crustal thickening and deformation sequence in the footwall to the suture of the Variscan Belt of Northwest Spain
(Perez-Estaun, A., *et al.*) 191(3-4): 243-253
— Factors controlling slip-lineation orientation on thrust-fault planes
(Wilkerson, M. Scott, *et al.*) 196(1-2): 203-208
— Indian Plate motion and shape; constraints on the geometry of the Himalayan Orogen
(Treloar, Peter J., *et al.*) 191(3-4): 189-198
— Internal structure of the Adra Nappe (Alpujarride Complex, Betics, Spain)
(Cuevas, Julia) 200(1-3): 199-212
— Mid-crustal detachment in the Betic System of Southeast Spain
(Banks, Chris J., *et al.*) 191(3-4): 275-289
— Seismic reflection trace synthesized from Proterozoic outcrop and its correlation to seismic profiles in northwestern Canada
(Cook, Frederick A., *et al.*) 191(1-2): 111-126
— Some constraints on the kinematics of the Tertiary Piemonte Basin (Northwest Italy)
(Hoogerduijn Strating, E. H., *et al.*) 198(1): 47-51
transcurrent faults: Crustal structure variations and transcurrent faulting at the eastern and western margins of the eastern Mediterranean
(Ben-Avraham, Zvi, *et al.*) 196(3-4): 269-277
— Geophysical constraints on tectonic models of the Taubate Basin, southeastern Brazil
(Padilha, A. L., *et al.*) 196(1-2): 157-172
— Late Hercynian extensional and transcurrent tectonics in central Iberia
(Doblas, Miguel) 191(3-4): 325-334
— Middle Paleocene terrane juxtaposition along the Median Tectonic Line, Southwest Japan; evidence from $^{40}Ar/^{39}Ar$ mineral ages
(Dallmeyer, R. D., *et al.*) 200(1-3): 281-297
— North Caribbean neotectonic events; the Trans-Haitian fault system; Tertiary record of an oblique transcurrent shear zone uplifted in Hispaniola
(Pubellier, M., *et al.*) 194(3): 217-236
wrench faults: Mobilism and plate tectonics in the USSR
(Khain, V. E.) 199(2-4): 137-148
— Persistent basement wrenching as controlling mechanism of Variscan thin-skinned thrusting and sedimentation, Cantabrian Mountains, Spain [discussion and reply]
(Alonso, J. L., *et al.*) 194(1-2): 171-182
— The post-Triassic sedimentary cover of Tunisia; seismic sequences and structure
(Bobier, C., *et al.*) 195(2-4): 371-410

faults—distribution
continental crust: Crustal fracturing and intraplate tectonics in the area between the North Sea and the Alps; a comparison of Landsat-derived fractures with existing map data
(Kronberg, Peter) 195(2-4): 261-269
— Fractal analysis of fracturing in two African regions, from satellite imagery to ground scale
(Vignes-Adler, Michele, *et al.*) 196(1-2): 69-86
fault scarps: Structure of the Warm Spring and northern Thousand Springs fault segments, Lost River fault zone, Idaho; possible effects on rupturing during the 1983 Borah Peak earthquake
(Bruhn, Ronald L., *et al.*) 200(1-3): 33-49
mid-ocean ridges: Periodicity in the accretion process on the Southeast Indian Ridge at 27°40'S
(Sauter, D., *et al.*) 195(1): 47-64
orogenic belts: Neogene tectonostratigraphy and kinematics of Calabrian basins; implications for the geodynamics of the central Mediterranean
(van Dijk, Janpieter, *et al.*) 196(1-2): 23-60

faults—effects
mylonites: Petrology of pseudotachylytes from the Alpine Fault of New Zealand
(Bossiere, G.) 196(1-2): 173-193
shear zones: A model of granitic melt formation by frictional heating on shear planes
(Frischbutter, Alexander, *et al.*) 194(1-2): 1-11
— Extensional tectonics of the Toledo ductile–brittle shear zone, central Iberian Massif
(Hernandez Enrile, J. L.) 191(3-4): 311-324
— Fluid evolution history of brittle-ductile shear zones on the hanging wall of Yellow Spring Thrust, Valley and Ridge Province, Pennsylvania, U.S.A.
(Srivastava, D. C., *et al.*) 198(1): 23-34
— Indosinian dextral ductile fault system and synkinematic plutonism in the southwest of the Ogcheon Belt (South Korea)
(Cluzel, D., *et al.*) 194(1-2): 131-151
— Initiation of cataclastic flow and development of cataclastic foliation in nonporous quartzites from a natural fault zone
(Babaie, Hassan A., *et al.*) 200(1-3): 67-77
— Strains and structures associated with a terrane bounding stretching fault; the Melones fault zone, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 194(1-2): 69-90
— Structural and metamorphic evolution of the Almaden de la Plata Core (Seville, Spain) in relation to syn-metamorphic shear between the Ossa-Morena and South Portuguese zones of the Iberian Variscan fold belt
(Abalos Villaro, B., *et al.*) 191(3-4): 365-387

faults—interpretation
classification: Proposal for classification of fault activity in an intraplate collision setting; definitions and examples
(Bles, J. L., *et al.*) 194(3): 279-293

faults—mechanics
stress: Paleostress inversion of fault-slip data using the shear stress solution of Means (1989)
(Fleischmann, Karl H., *et al.*) 196(1-2): 195-202
tension: Meso-Cenozoic faulting and inferred palaeostresses in the Mons Basin, Belgium
(Vandycke, S., *et al.*) 192(3-4): 261-271

faults—patterns
en echelon faults: Early Cretaceous extension in Northeast Brazil related to the South Atlantic opening
(Senant, Jacques, *et al.*) 198(1): 35-46

faults—systems
block structures: Multiple Miocene block rotation in the Bakony Mountains, Transdanubian Central Range, Hungary
(Tari, G.) 199(1): 93-108
— Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268
grabens: On the mechanism of graben formation
(Artyushkov, Eugene V., *et al.*) 197(2-4): 99-115
— Structure and development of the Sveinagja Graben, Northeast Iceland
(Gudmundsson, Agust, *et al.*) 200(1-3): 111-125
rift zones: A COCORP deep reflection profile across the buried Reelfoot Rift, south-central United States
(Nelson, K. D., *et al.*) 197(2-4): 271-293

— A comparative study of the Rio Grande and Kenya rifts
(Keller, G. Randy, *et al.*) 197(2-4): 355-371
— A preliminary description of the Gan-Hang failed rift, southeastern China
(Goodell, P. C., *et al.*) 197(2-4): 245-255
— Active compressional tectonics in the Jericho area, Dead Sea Rift
(Rotstein, Y., *et al.*) 198(2-4): 239-259
— Aeromagnetic constraints on the geostructural interpretation of the southern part of the Sardinian Rift, Italy
(Balia, R., *et al.*) 195(2-4): 347-358
— Backarc extension versus continental breakup; petrological aspects for active rifting
(Tatsumi, Yoshiyuki, *et al.*) 197(2-4): 127-137
— Continental rift structures and dynamics with reference to teleseismic studies of the Rio Grande and East African rifts
(Davis, Paul M.) 197(2-4): 309-325
— Crustal extension in the Baikal rift zone
(Zorin, Yu. A., *et al.*) 198(1): 117-121
— Crustal structure and tectonic evolution of the Anza Rift, northern Kenya
(Greene, L. C., *et al.*) 197(2-4): 203-211
— Crustal thinning in relationship to the evolution of the Afro–Arabian rift system; a review of seismic-refraction data
(Prodehl, Claus, *et al.*) 198(2-4): 311-327
— Faulting within the eastern Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 109-139
— Faulting within the western Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 87-107
— Lithospheric thinning, uplift, and heat flow preceding rifting
(Mareschal, Jean-Claude, *et al.*) 197(2-4): 117-126
— Meso–Cenozoic taphrogeny and dispersion in the continental margin of Southeast China and adjacent seas
(Qiu Yuanxi, *et al.*) 197(2-4): 257-269
— Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354
— Post-Pan-African tectonic evolution of South Malawi in relation to the Karroo and Recent East African Rift systems
(Castaing, C.) 191(1-2): 55-73
— Shear-controlled evolution of the Red Sea; pull apart model
(Makris, Jannis, *et al.*) 198(2-4): 441-466
— The Afro-Arabian rift system; an overview
(Girdler, R. W.) 197(2-4): 139-153
— The Dead Sea Rift; from continental rift to incipient ocean
(Mart, Yossi) 197(2-4): 155-179
— The position of continental flood basalts in rift zones and its bearing on models of rifting
(Kazmin, V. G.) 199(2-4): 375-387
— Thermal and kinematic model of the southern Rio Grande Rift; inferences from crustal and mantle xenoliths from Kilbourne Hole, New Mexico
(Bussod, Gilles Y. A., *et al.*) 197(2-4): 373-389
— Timing and spatial distribution of rifting in China
(Gilder, Stuart A., *et al.*) 197(2-4): 225-243
— World rift systems
(Gangi, A. F.) 197(2-4): 99-389

fluid inclusions *see also* inclusions

fluid inclusions—P-T conditions
shear zones: Fluid evolution history of brittle-ductile shear zones on the hanging wall of Yellow Spring Thrust, Valley and Ridge Province, Pennsylvania, U.S.A.
(Srivastava, D. C., *et al.*) 198(1): 23-34

fluvial features *see under* geomorphology

folding *see* folds

folds *see also* faults; foliation

folds—distribution
USSR: Tectonics of the Verkhoyansk–Kolyma Mesozoides in the context of plate tectonics
(Parfenov, L. M.) 199(2-4): 319-342

folds—mechanics
flexure: Finite-element models of buckle folds in non-linear materials
(Lan, Labao, *et al.*) 199(1): 1-12

folds—orientation
nappes: Ductile deformation and Miocene nappe-stacking in Taiwan related to motion of the Philippine Sea Plate
(Faure, M., *et al.*) 198(1): 95-105
— Internal structure of the Adra Nappe (Alpujarride Complex, Betics, Spain)
(Cuevas, Julia) 200(1-3): 199-212
— Mobilism and plate tectonics in the USSR
(Khain, V. E.) 199(2-4): 137-148
— Tectonic nappes and horizontal layering of the Earth's crust in the Mediterranean Belt (Carpathians, Balkanides and Caucasus)
(Gamkrelidze, I. P.) 196(3-4): 385-396
superposed folds: The overprint of the Alpine tectono-metamorphic evolution on the Hercynian Orogen; an example from the Apuane Alps (Northern Apennines, Italy)
(Conti, P., *et al.*) 191(3-4): 335-346

folds—style
domes: Interactive property of large thrust sheets with footwall rocks; the subthrust interactive duplex hypothesis; a mechanism of dome formation in thrust sheets
(Hatcher, Robert D., Jr.) 191(3-4): 237-242
monoclines: Active compressional tectonics in the Jericho area, Dead Sea Rift
(Rotstein, Y., *et al.*) 198(2-4): 239-259

foliation *see also* folds; structural analysis

foliation—style
cleavage: Strains and structures associated with a terrane bounding stretching fault; the Melones fault zone, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 194(1-2): 69-90

Formosa *see* Taiwan

fossils *see* appropriate fossil group

foundations *see also* rock mechanics; soil mechanics

fractures—distribution
continental crust: Crustal fracturing and intraplate tectonics in the area between the North Sea and the Alps; a comparison of Landsat-derived fractures with existing map data
(Kronberg, Peter) 195(2-4): 261-269

fractures—experimental studies
microcracks: Complete seismic properties obtained from microcrack fabrics and textures in an amphibolite from the Ivrea Zone, Western Alps, Italy
(Siegesmund, S., *et al.*) 199(1): 13-24

fractures—genesis
dehydration: Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198
stress: Plane stress and plane strain fracture in Eocene chalks around Beer Sheva
(Bahat, D.) 196(1-2): 61-67

fractures—patterns
fractals: Fractal analysis of fractures in rocks; the Cantor's dust method [discussion and reply]
(Harris, Chris, *et al.*) 198(1): 107-115
— Fractal analysis of fracturing in two African regions, from satellite imagery to ground scale
(Vignes-Adler, Michele, *et al.*) 196(1-2): 69-86
fractures—style
joints: Structure and development of the Sveinagja Graben, Northeast Iceland
(Gudmundsson, Agust, *et al.*) 200(1-3): 111-125
France—structural geology
neotectonics: A new digital method for analysis of neotectonics applied to the Bonnevaux-Chambaran area, France
(Colleau, A., *et al.*) 194(3): 295-305
— Proposal for classification of fault activity in an intraplate collision setting; definitions and examples
(Bles, J. L., *et al.*) 194(3): 279-293
— Stress field changes in the Rhone Valley from the Miocene to the present
(Bles, J. L., *et al.*) 194(3): 265-277
orogeny: Superposed strain patterns versus plurifacial metamorphic evolution in the Monts du Lyonnais area (French Massif Central); a record of subduction, collision and intracontinental evolution in the Variscan orogenic belt
(Lardeaux, J. M.) 191(3-4): 427
gas inclusions *see* fluid inclusions
geochronology *see also* absolute age
geodesy—surveys
Pacific Coast: Horizontal deformation in the Cascadia subduction zone as derived from serendipitous geodetic data
(Snay, Richard A., *et al.*) 194(1-2): 59-67
geologic barometry *see under* P-T conditions *under* metamorphism
geologic hazards *see also* earthquakes; *see also under* engineering geology *under* Alps; *see also under* environmental geology *under* Morocco
geologic hazards—earthquakes
data bases: Some ideas for a databank of macroseismic data
(Postpischl, D., *et al.*) 193(1-3): 215-223
focal mechanism: Focal mechanism of an earthquake of Baroque age in the "Regno delle Due Sicilie" (southern Italy)
(Chiaruttini, C., *et al.*) 193(1-3): 195-203
history: An outline of historical seismicity studies in Catalonia
(Olivera, C., *et al.*) 193(1-3): 231-235
— Destructive historical earthquakes in Soviet Armenia
(Nikonov, A. A.) 193(1-3): 225-229
— Earthquakes felt in Trieste from the Middle Ages to the 18th century
(Degasperi, C., *et al.*) 193(1-3): 53-63
— Historical earthquakes in central Italy; case histories in the Marche area
(Monachesi, G., *et al.*) 193(1-3): 95-107
— Investigation of historical earthquakes in Europe
(Stucchi, M., *et al.*) 193(1-3): 1-251
— Investigation of 18th century seismicity in central Italy in the light of the 1741 Fabriano earthquake
(Stucchi, M., *et al.*) 193(1-3): 65-82
— Palaeoseismicity from karst sediments; the "Grotta del Cervo" cave case study (central Italy)
(Postpischl, D., *et al.*) 193(1-3): 33-44
— Palaeoseismology; review of the state-of-the-art
(Vittori, Eutizio, *et al.*) 193(1-3): 9-32
— Problems regarding the investigation of the 1790 Oran seismic period
(Lopez Marinas, J. M., *et al.*) 193(1-3): 237-239
— The effects of the November 1, 1755 "Lisbon" earthquake in Morocco
(Levret, A.) 193(1-3): 83-94
liquefaction: Soil liquefaction; case histories in Italy
(Berardi, R., *et al.*) 193(1-3): 141-164
prediction: Constraints on the usefulness of gravimetry for detecting precursory crustal deformations
(Lambert, A., *et al.*) 193(4): 369-375
— Earthquake prediction
(Wyss, Max) 193(4): 253-410
— Maps of expected earthquakes based on a combination of parameters
(Sobolev, G. A., *et al.*) 193(4): 255-265
— Pore-pressure variation as a precursory phenomenon; the need for and a list of supplementary data
(Kumpel, H. J.) 193(4): 377-383
— Seismicity pattern for earthquakes near Bhatsa Reservoir, India
(Srivastava, H. N., *et al.*) 196(1-2): 141-156
— Structure of optimal strategies in earthquake prediction
(Molchan, George M.) 193(4): 267-276
— The use of historical data in earthquake prediction; an example from water-level variations and seismicity
(Mucciarelli, Marco, *et al.*) 193(1-3): 247-251
seismic intensity: Macroseismic characteristics of the main earthquakes of the 19th century in southern Italy; a review
(Marturano, A., *et al.*) 193(1-3): 241-245
— Macroseismic intensity versus epicentral distances; the case of central Italy
(Grandori, G., *et al.*) 193(1-3): 165-171
— Problems regarding the macroseismicity of the Calabro-Sicilian region; a review
(Bottari, A., *et al.*) 193(1-3): 185-194
— The Algerian earthquake of 24 June 1910; a case history
(Ambraseys, N. N., *et al.*) 193(1-3): 205-213
— The 14 January 1810 earthquake in Mor, Hungary; the first isoseismal map
(Stegena, L., *et al.*) 193(1-3): 109-115
— The 1846 Orciano (Pisa) earthquake in published sources and government survey documents
(Albini, P., *et al.*) 193(1-3): 117-130
— The 1887 Ligurian earthquake; a detailed study from contemporary scientific observations
(Ferrari, Graziano) 193(1-3): 131-139
seismic risk: Assessment of earthquake hazard in the Tokyo area, Japan
(Rikitake, T.) 199(1): 121-131
— Probabilistic assessment of earthquake hazard in Vietnam based on seismotectonic regionalization
(Nguyen Hong Phuong) 198(1): 81-93
— Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183
— Seismic hazard evaluation for specific seismic regions of the world
(Tsapanos, Theodoros M., *et al.*) 194(1-2): 153-169
seismic sources: Erratum; Source geometry of historical events retrieved by synthetic isoseismals
(Panza, G. F., *et al.*) 199(1): 136
— Source geometry of historical events retrieved by synthetic isoseismals
(Panza, G. F., *et al.*) 193(1-3): 173-184
geologic hazards—faults
classification: Proposal for classification of fault activity in an intraplate collision setting; definitions and examples
(Bles, J. L., *et al.*) 194(3): 279-293

geologic thermometry *see under* xenoliths *under* inclusions

geologic time *see* absolute age

geomorphology—controls
tectonic controls: Extensional development of Gabo Valley, southern Tibet
(Burchfiel, B. C., *et al.*) 194(1-2): 187-193
— Geological evidence for the last two faulting events on the North Anatolian fault zone in the Mudurnu Valley, western Turkey
(Ikeda, Yasutaka, *et al.*) 193(4): 335-345
— Structure of the Warm Spring and northern Thousand Springs fault segments, Lost River fault zone, Idaho; possible effects on rupturing during the 1983 Borah Peak earthquake
(Bruhn, Ronald L., *et al.*) 200(1-3): 33-49
— The effect of movement on high-angle faults on stratigraphy and structure; the Attico-Cycladic Massif, Greece
(Avdis, Vaios) 192(3-4): 293-311

geomorphology—fluvial features
drainage basins: Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin
(Deffontaines, B., *et al.*) 194(3): 237-263
terraces: Neotectonics and geomorphology in the Rhenish Massif and the Hessian Basin
(Semmel, Arno) 195(2-4): 291-297

geomorphology—interpretation
morphostructures: A new digital method for analysis of neotectonics applied to the Bonnevaux-Chambaran area, France
(Colleau, A., *et al.*) 194(3): 295-305

geomorphology—landform evolution
depressions: The Dead Sea Rift; from continental rift to incipient ocean
(Mart, Yossi) 197(2-4): 155-179

geomorphology—solution features
speleothems: Palaeoseismicity from karst sediments; the "Grotta del Cervo" cave case study (central Italy)
(Postpischl, D., *et al.*) 193(1-3): 33-44

geophysical methods—gravity methods
applications: Constraints on the usefulness of gravimetry for detecting precursory crustal deformations
(Lambert, A., *et al.*) 193(4): 369-375

geophysical surveys *see under* Alps; Arctic Ocean; Brazil; Colorado Plateau; data processing; Europe; Germany; India; Ionian Sea; Italy; Kenya; Middle East; Mississippi Valley; New Mexico; Nigeria; Oregon; Pacific Ocean; Red Sea; Sardinia; Scandinavia; Spain; Sweden; Tunisia; Turkey; Washington; *see* acoustical surveys *under* geophysical surveys *under* data processing; *see* gravity surveys *under* geophysical surveys *under* Europe; *see* magnetic surveys *under* geophysical surveys *under* Arctic Ocean; Nigeria; Pacific Ocean; Red Sea; Sardinia; Spain; Turkey; *see* seismic surveys *under* geophysical surveys *under* Alps; Germany; Ionian Sea; Italy; Middle East; Mississippi Valley; Pacific Ocean; Red Sea; Scandinavia; Sweden; Tunisia; *see* surveys *under* geophysical surveys *under* Brazil; Europe; Kenya; Red Sea; *see also* geophysical methods

geophysics *see also* deformation

Georgia—structural geology
deformation: Initiation of cataclastic flow and development of cataclastic foliation in nonporous quartzites from a natural fault zone
(Babaie, Hassan A., *et al.*) 200(1-3): 67-77

geosynclines *see also* orogeny

geothermics *see* heat flow

Germany—geochemistry
crust: Crustal xenoliths from Cenozoic volcanic fields of West Germany; implications for structure and composition of the continental crust
(Mengel, K., *et al.*) 195(2-4): 271-289
trace elements: Crustal xenoliths from Cenozoic volcanic fields of West Germany; implications for structure and composition of the continental crust
(Mengel, K., *et al.*) 195(2-4): 271-289

Germany—geophysical surveys
seismic surveys: Crustal-scale balanced cross sections through the Variscan fold belt, Germany; the central EGT-segment
(Behrmann, J., *et al.*) 196(1-2): 1-21
— Geological interpretation of DEKORP deep seismic reflection profiles 1C and 9N across the Variscan Saar-Nahe Basin, Southwest Germany
(Korsch, R. J., *et al.*) 191(1-2): 127-146

Germany—petrology
igneous rocks: A model of granitic melt formation by frictional heating on shear planes
(Frischbutter, Alexander, *et al.*) 194(1-2): 1-11

Germany—structural geology
neotectonics: Neotectonics and geomorphology in the Rhenish Massif and the Hessian Basin
(Semmel, Arno) 195(2-4): 291-297

Germany—tectonophysics
crust: Crustal-scale balanced cross sections through the Variscan fold belt, Germany; the central EGT-segment
(Behrmann, J., *et al.*) 196(1-2): 1-21
heat flow: Crustal temperatures along the central segment of the European Geotraverse
(Cermak, V., *et al.*) 195(2-4): 241-251

glacial geology *see also* geomorphology

glasses *see under* igneous rocks

global tectonics *see* plate tectonics

Gondwana *see under* continental drift

grabens *see under* systems *under* faults

granites *see under* igneous rocks

Great Lakes region *see also* the individual states and provinces

Great Plains *see also* the individual states and provinces

Greater Antilles—structural geology
deformation: Deformation in the blueschists of the Greater Antilles; subduction versus collision processes
(Draper, G.) 191(3-4): 415-416

Greece—geochemistry
trace elements: Early Mesozoic oceanic subduction-related volcanic rocks, Pindos Basin, Greece
(Pe-Piper, Georgia, *et al.*) 192(3-4): 273-292

Greece—seismology
earthquakes: Source mechanisms of Recent earthquakes in the Hellenic Arc from broadband data
(Liakopoulou, F., *et al.*) 200(1-3): 233-248
— Temporal characteristics of some earthquake sequences in Greece
(Latoussakis, J., *et al.*) 193(4): 299-310

Greece—structural geology
faults: The effect of movement on high-angle faults on stratigraphy and structure; the Attico-Cycladic Massif, Greece
(Avdis, Vaios) 192(3-4): 293-311

Greenland—tectonophysics
plate tectonics: Early Proterozoic collision tectonics, and rapakivi granites as intrusions in an extensional thrust-thickened crust; the Ketilidian Orogen, South Greenland
(Windley, Brian F.) 195(1): 1-10

ground water—levels
statistical analysis: The use of historical data in earthquake prediction; an example from water-level variations and seismicity
(Mucciarelli, Marco, *et al.*) 193(1-3): 247-251
variations: Pore-pressure variation as a precursory phenomenon; the need for and a list of supplementary data
(Kumpel, H. J.) 193(4): 377-383
— Well-level variation as a possible seismic precursor; a statistical assessment from Italian historical data
(Albarello, Dario, *et al.*) 193(4): 385-395

ground water—movement
effects: Heat flow on the southern Colorado Plateau
(Minier, Jeffrie, *et al.*) 200(1-3): 51-66

Gulf Coastal Plain *see also* the individual states and countries

Gulf of Aden—tectonophysics
crust: Evolution of eastern Afar and the Gulf of Tadjura
(Clin, M.) 198(2-4): 355-368
— The gravity field of the Red Sea and East Africa
(Makris, Jannis, *et al.*) 198(2-4): 369-381

Haiti—structural geology
neotectonics: North Caribbean neotectonic events; the Trans-Haitian fault system; Tertiary record of an oblique transcurrent shear zone uplifted in Hispaniola
(Pubellier, M., *et al.*) 194(3): 217-236

heat flow *see also under* geophysical surveys *under* Colorado Plateau; India; New Mexico; *see also under* tectonophysics *under* Atlantic Ocean; Australia; Canadian Shield; Europe; Germany; Indian Ocean; Japan; New Mexico; Red Sea; Scandinavia; symposia

heat flow—concepts
hot spots: Hot-field tectonics
(Zonenshain, L. P., *et al.*) 199(2-4): 165-192

heat flow—heat sources
continental crust: A heat production model of the crust and upper mantle
(Cermak, Vladimir, *et al.*) 194(4): 307-323
friction: A model of granitic melt formation by frictional heating on shear planes
(Frischbutter, Alexander, *et al.*) 194(1-2): 1-11

heat flow—interpretation
numerical models: Forward and inverse techniques in geothermal modelling
(Cermak, Vladimir, *et al.*) 194(4): 307-428
rifting: Lithospheric thinning, uplift, and heat flow preceding rifting
(Mareschal, Jean-Claude, *et al.*) 197(2-4): 117-126

Himalayas *see also* the individual countries

Himalayas—seismology
earthquakes: Inversion of seismological data using a controlled random search global optimization technique
(Shanker, K., *et al.*) 198(1): 73-80

Himalayas—structural geology
orogeny: Indian Plate motion and shape; constraints on the geometry of the Himalayan Orogen
(Treloar, Peter J., *et al.*) 191(3-4): 189-198

Holocene *see also under* geochronology *under* Saudi Arabia; Turkey

Hungary—seismology
earthquakes: The 14 January 1810 earthquake in Mor, Hungary; the first isoseismal map
(Stegena, L., *et al.*) 193(1-3): 109-115

Hungary—structural geology
faults: Evolution of the stress fields in the Carpatho-Pannonian area during the Neogene
(Csontos, L., *et al.*) 199(1): 73-91
— Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232
neotectonics: Multiple Miocene block rotation in the Bakony Mountains, Transdanubian Central Range, Hungary
(Tari, G.) 199(1): 93-108

hydrogeology *see also* ground water

hydrology *see also* ground water

Iberian Peninsula *see also* Portugal; Spain

Iceland—tectonophysics
plate tectonics: Structure and development of the Sveinagja Graben, Northeast Iceland
(Gudmundsson, Agust, *et al.*) 200(1-3): 111-125

Idaho—seismology
earthquakes: Structure of the Warm Spring and northern Thousand Springs fault segments, Lost River fault zone, Idaho; possible effects on rupturing during the 1983 Borah Peak earthquake
(Bruhn, Ronald L., *et al.*) 200(1-3): 33-49

Idaho—structural geology
neotectonics: Structure of the Warm Spring and northern Thousand Springs fault segments, Lost River fault zone, Idaho; possible effects on rupturing during the 1983 Borah Peak earthquake
(Bruhn, Ronald L., *et al.*) 200(1-3): 33-~~49~~

igneous rocks *see also* fluid inclusions; inclusions; intrusions; lava; magmas; metamorphic rocks

igneous rocks—alkali basalts
petrology: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180

igneous rocks—basalts
genesis: Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201
tholeiite: High-Ti continental tholeiites from the Aznam Trough, northwestern Saudi Arabia; evidence of "abortive" rifting in the "embryonic" stage of Red Sea opening
(Suayah, Ismail B., *et al.*) 191(1-2): 75-87

igneous rocks—diorites
tonalite: Emplacement and deformation of granitoids during volcanic arc construction in the Foothills Terrane, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 191(1-2): 89-110

igneous rocks—glasses
mechanical properties: Experimental deformation of a glassy basalt
(Hacker, Bradley R., *et al.*) 200(1-3): 79-96

igneous rocks—granites
genesis: A model of granitic melt formation by frictional heating on shear planes
(Frischbutter, Alexander, *et al.*) 194(1-2): 1-11
geochemistry: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358
rapakivi: Early Proterozoic collision tectonics, and rapakivi granites as intrusions in an extensional thrust-thickened crust; the Ketilidian Orogen, South Greenland
(Windley, Brian F.) 195(1): 1-10

igneous rocks—plutonic rocks
genesis: Genesis of a Variscan batholith; field, petrological and mineralogical evidence from the Corsica–Sardinia Batholith
(Rossi, Philippe, *et al.*) 195(2-4): 319-346

igneous rocks—ultramafics
ophiolite: Concordant paleolatitudes from ophiolite sequences in the Northern California Coast Ranges, U.S.A.
(Mankinen, Edward A., *et al.*) 198(1): 1-21
— The ophiolites of Northeast India; a subduction zone ophiolite complex of the Indo-Burman orogenic belt
(Bhattacharjee, C. C.) 191(3-4): 213-222
igneous rocks—volcanic rocks
genesis: Early Mesozoic oceanic subduction-related volcanic rocks, Pindos Basin, Greece
(Pe-Piper, Georgia, *et al.*) 192(3-4): 273-292
— Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202
— Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354
— The Neogene ash-flow caldera of A'ithayn; an eruptive centre upon the Trap Series in central North Yemen
(Heyckendorf, K., *et al.*) 198(2-4): 223-238
geochemistry: Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
inclusions *see also* fluid inclusions
inclusions—xenoliths
basalts: Xenolith geotherms and crustal models in eastern Australia
(Cull, J. P., *et al.*) 192(3-4): 359-366
composition: Crustal xenoliths from Cenozoic volcanic fields of West Germany; implications for structure and composition of the continental crust
(Mengel, K., *et al.*) 195(2-4): 271-289
geologic thermometry: Thermal and kinematic model of the southern Rio Grande Rift; inferences from crustal and mantle xenoliths from Kilbourne Hole, New Mexico
(Bussod, Gilles Y. A., *et al.*) 197(2-4): 373-389
India—engineering geology
reservoirs: Seismicity pattern for earthquakes near Bhatsa Reservoir, India
(Srivastava, H. N., *et al.*) 196(1-2): 141-156
India—geophysical surveys
heat flow: Heat flow and heat generation in the Archaean Dharwar cratons and implications for the southern Indian Shield geotherm and lithospheric thickness
(Gupta, M. L., *et al.*) 194(1-2): 107-122
remote sensing: Definition of the continent-ocean boundary of India and the surrounding oceanic regions from Magsat data
(Singh, B. P., *et al.*) 192(1-2): 145-151
India—seismology
earthquakes: Seismicity pattern for earthquakes near Bhatsa Reservoir, India
(Srivastava, H. N., *et al.*) 196(1-2): 141-156
India—tectonophysics
crust: A crustal density model across the Cambay Basin, India, and its relationship with the Aravallis
(Tewari, H. C., *et al.*) 194(1-2): 123-130
— Definition of the continent-ocean boundary of India and the surrounding oceanic regions from Magsat data
(Singh, B. P., *et al.*) 192(1-2): 145-151
— Heat flow and heat generation in the Archaean Dharwar cratons and implications for the southern Indian Shield geotherm and lithospheric thickness
(Gupta, M. L., *et al.*) 194(1-2): 107-122
plate tectonics: Indian Plate motion and shape; constraints on the geometry of the Himalayan Orogen
(Treloar, Peter J., *et al.*) 191(3-4): 189-198
— The ophiolites of Northeast India; a subduction zone ophiolite complex of the Indo-Burman orogenic belt
(Bhattacharjee, C. C.) 191(3-4): 213-222
Indian Ocean *see also* Arabian Sea; Gulf of Aden; Red Sea
Indian Ocean—oceanography
ocean floors: Periodicity in the accretion process on the Southeast Indian Ridge at 27°40'S
(Sauter, D., *et al.*) 195(1): 47-64
Indian Ocean—tectonophysics
crust: Definition of the continent-ocean boundary of India and the surrounding oceanic regions from Magsat data
(Singh, B. P., *et al.*) 192(1-2): 145-151
— Susceptibility and Koenigsberger ratio of the oceanic crust deduced from magnetic reversals southeast of the Agulhas Bank
(Day, R. W., *et al.*) 192(1-2): 97-101
heat flow: Heat flow modelling; a generalized two-dimensional diffusive and convective numerical model for the Exmouth Plateau, offshore Northwest Australia
(Swift, Michael G.) 194(4): 409-426
plate tectonics: Investigation of plate boundaries in the eastern Indian Ocean using Magsat data
(Taylor, Patrick T.) 192(1-2): 153-158
sea-floor spreading: Periodicity in the accretion process on the Southeast Indian Ridge at 27°40'S
(Sauter, D., *et al.*) 195(1): 47-64
intrusions *see also* igneous rocks; metamorphism
intrusions—batholiths
genesis: Genesis of a Variscan batholith; field, petrological and mineralogical evidence from the Corsica–Sardinia Batholith
(Rossi, Philippe, *et al.*) 195(2-4): 319-346
intrusions—dikes
dike swarms: Structure of Yemeni Miocene dike swarms, and emplacement of coeval granite plutons
(Mohr, Paul) 198(2-4): 203-221
emplacement: Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201
— The Neogene ash-flow caldera of A'ithayn; an eruptive centre upon the Trap Series in central North Yemen
(Heyckendorf, K., *et al.*) 198(2-4): 223-238
— Thermal and kinematic model of the southern Rio Grande Rift; inferences from crustal and mantle xenoliths from Kilbourne Hole, New Mexico
(Bussod, Gilles Y. A., *et al.*) 197(2-4): 373-389
magnetic anomalies: A strategy of tectonomagnetic observation for monitoring possible precursors to earthquakes in the western part of the North Anatolian fault zone, Turkey
(Oshiman, N., *et al.*) 193(4): 359-368
intrusions—distribution
magnetic anomalies: Magnetic expressions of intrusions including magnetic aureoles
(Schwarz, Erik J.) 192(1-2): 191-200
intrusions—emplacement
evolution: Tectonic development of passive continental margins of the southern and central Red Sea with a comparison to Wilkes Land, Antarctica
(Bohannon, Robert G., *et al.*) 198(2-4): 129-154
orogenic belts: Early Proterozoic collision tectonics, and rapakivi granites as intrusions in an extensional thrust-thickened crust; the Ketilidian Orogen, South Greenland
(Windley, Brian F.) 195(1): 1-10

intrusions—plutons
emplacement: Emplacement and deformation of granitoids during volcanic arc construction in the Foothills Terrane, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 191(1-2): 89-110
— Indosinian dextral ductile fault system and synkinematic plutonism in the southwest of the Ogcheon Belt (South Korea)
(Cluzel, D., *et al.*) 194(1-2): 131-151
intrusions—ring complexes
distribution: Magnetic anomalies in the Nigerian continental mass based on aeromagnetic surveys
(Ajakiaye, D. E., *et al.*) 192(1-2): 211-230
Ionian Sea—geophysical surveys
seismic surveys: Erratum; Ionian Basin and Calabria Arc; some new elements from DSS data
(Ferrucci, F., *et al.*) 199(1): 136
— Ionian Basin and Calabria Arc; some new elements from DSS data
(Ferrucci, F., *et al.*) 195(2-4): 411-419
Iran—tectonophysics
crust: Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268
iron—geochemistry
slates: A study of colour changes in purple–green slate by petrological and rock-magnetic methods
(Borradaile, Graham John, *et al.*) 200(1-3): 157-172
isostasy *see also under* tectonophysics *under* Africa; North America; Scandinavia
isotope dating *see* absolute age
isotopes *see also* absolute age
isotopes—igneous rocks
granites: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358
volcanic rocks: Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
isotopes—radon
Rn-222: Earthquake forerunners in a selected area of northern Italy; recent developments in automatic geochemical monitoring
(Martinelli, G., *et al.*) 193(4): 397-410
isotopes—strontium
Sr-87/Sr-86: High-Ti continental tholeiites from the Aznam Trough, northwestern Saudi Arabia; evidence of "abortive" rifting in the "embryonic" stage of Red Sea opening
(Suayah, Ismail B., *et al.*) 191(1-2): 75-87
— Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201
Israel—structural geology
fractures: Plane stress and plane strain fracture in Eocene chalks around Beer Sheva
(Bahat, D.) 196(1-2): 61-67
Italy—engineering geology
earthquakes: Earthquake forerunners in a selected area of northern Italy; recent developments in automatic geochemical monitoring
(Martinelli, G., *et al.*) 193(4): 397-410
— Well-level variation as a possible seismic precursor; a statistical assessment from Italian historical data
(Albarello, Dario, *et al.*) 193(4): 385-395
soil mechanics: Soil liquefaction; case histories in Italy
(Berardi, R., *et al.*) 193(1-3): 141-164
Italy—geochronology
Quaternary: Palaeoseismicity from karst sediments; the "Grotta del Cervo" cave case study (central Italy)
(Postpischl, D., *et al.*) 193(1-3): 33-44
Italy—geophysical surveys
seismic surveys: Erratum; Ionian Basin and Calabria Arc; some new elements from DSS data
(Ferrucci, F., *et al.*) 199(1): 136
— Ionian Basin and Calabria Arc; some new elements from DSS data
(Ferrucci, F., *et al.*) 195(2-4): 411-419
Italy—seismology
earthquakes: Earthquakes felt in Trieste from the Middle Ages to the 18th century
(Degasperi, C., *et al.*) 193(1-3): 53-63
— Focal mechanism of an earthquake of Baroque age in the "Regno delle Due Sicilie" (southern Italy)
(Chiaruttini, C., *et al.*) 193(1-3): 195-203
— Historical earthquakes in central Italy; case histories in the Marche area
(Monachesi, G., *et al.*) 193(1-3): 95-107
— Investigation of 18th century seismicity in central Italy in the light of the 1741 Fabriano earthquake
(Stucchi, M., *et al.*) 193(1-3): 65-82
— Macroseismic characteristics of the main earthquakes of the 19th century in southern Italy; a review
(Marturano, A., *et al.*) 193(1-3): 241-245
— Macroseismic intensity versus epicentral distances; the case of central Italy
(Grandori, G., *et al.*) 193(1-3): 165-171
— Problems regarding the macroseismicity of the Calabro-Sicilian region; a review
(Bottari, A., *et al.*) 193(1-3): 185-194
— The use of historical data in earthquake prediction; an example from water-level variations and seismicity
(Mucciarelli, Marco, *et al.*) 193(1-3): 247-251
— The 1846 Orciano (Pisa) earthquake in published sources and government survey documents
(Albini, P., *et al.*) 193(1-3): 117-130
— The 1887 Ligurian earthquake; a detailed study from contemporary scientific observations
(Ferrari, Graziano) 193(1-3): 131-139
seismicity: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183
Italy—structural geology
deformation: Deformation and metamorphism during subduction and obduction of layered peridotites from the Alpine Piemonte ophiolite nappe
(Vogler, W. S.) 191(3-4): 445
— Deformation and recrystallization mechanisms in naturally deformed omphacites from the Sesia-Lanzo Zone; geophysical consequences
(Buatier, M., *et al.*) 195(1): 11-27
— Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198
— Obduction-induced deformation in the footwall of the early Alpine Suture, Penninic Realm, northern Italy
(Vogler, W. S.) 191(3-4): 444

faults: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232
— Neogene tectonostratigraphy and kinematics of Calabrian basins; implications for the geodynamics of the central Mediterranean
(van Dijk, Janpieter, *et al.*) 196(1-2): 23-60
— Some constraints on the kinematics of the Tertiary Piemonte Basin (Northwest Italy)
(Hoogerduijn Strating, E. H., *et al.*) 198(1): 47-51
fractures: Complete seismic properties obtained from microcrack fabrics and textures in an amphibolite from the Ivrea Zone, Western Alps, Italy
(Siegesmund, S., *et al.*) 199(1): 13-24
neotectonics: Some aspects of the Recent tectonics in the Strait of Messina, Italy
(Montenat, Christian, *et al.*) 194(3): 203-215
orogeny: The overprint of the Alpine tectono-metamorphic evolution on the Hercynian Orogen; an example from the Apuane Alps (Northern Apennines, Italy)
(Conti, P., *et al.*) 191(3-4): 335-346

Italy—tectonophysics
crust: Erratum; Ionian Basin and Calabria Arc; some new elements from DSS data
(Ferrucci, F., *et al.*) 199(1): 136
— Ionian Basin and Calabria Arc; some new elements from DSS data
(Ferrucci, F., *et al.*) 195(2-4): 411-419
mantle: Upper mantle properties of the Tuscan–Tyrrhenian area; a framework for its Recent tectonic evolution
(Della Vedova, B., *et al.*) 195(2-4): 311-318

Japan—geochronology
Paleocene: Middle Paleocene terrane juxtaposition along the Median Tectonic Line, Southwest Japan; evidence from $^{40}Ar/^{39}Ar$ mineral ages
(Dallmeyer, R. D., *et al.*) 200(1-3): 281-297

Japan—sedimentary petrology
sedimentary rocks: Petrology of serpentine sandstone as a key to tectonic development of serpentine belts
(Arai, S., *et al.*) 195(1): 65-81

Japan—seismology
earthquakes: Analysis and interpretation of the heterogeneous rupture process; application of the empirical Green's function method and nonlinear inversion technique to large earthquakes
(Fukuyama, Eiichi) 197(1): 1-17
— Assessment of earthquake hazard in the Tokyo area, Japan
(Rikitake, T.) 199(1): 121-131
— Changes in the magnitude–frequency b-value prior to large ($M > 6.0$) earthquakes in Japan
(Imoto, Masajiro) 193(4): 311-325
— Comparison of the aftershock distribution and the fault plane size of the M 4.9 Kameoka earthquake on May 28, 1987, Japan
(Maeda, Naoki) 197(1): 55-71
— Geothermal and rheological implications of intracontinental earthquakes beneath the Kanto–Tokai region, central Japan
(Bodri, B., *et al.*) 194(4): 337-347
— Minimum size of earthquakes and minimum value of dynamic rupture velocity
(Iio, Yoshihisa) 197(1): 19-25
— Seismotectonics of intermediate-depth earthquakes from properties of aftershock sequences
(Kisslinger, C., *et al.*) 197(1): 27-40
mantle: Three-dimensional Q structure beneath the Kanto-Tokai District, Japan
(Sekiguchi, S.) 195(1): 83-104

Japan—structural geology
structural analysis: Controls on the structural development of an accretionary complex; the Shimanto Belt, Southwest Japan
(Needham, D. T., *et al.*) 191(3-4): 433

Japan—tectonophysics
crust: Geothermal and rheological implications of intracontinental earthquakes beneath the Kanto–Tokai region, central Japan
(Bodri, B., *et al.*) 194(4): 337-347
— Relations between deep temperatures and other geophysical characteristics in central Honshu, Japan
(Bodri, B., *et al.*) 194(4): 325-336
heat flow: Geothermal and rheological implications of intracontinental earthquakes beneath the Kanto–Tokai region, central Japan
(Bodri, B., *et al.*) 194(4): 337-347
— Relations between deep temperatures and other geophysical characteristics in central Honshu, Japan
(Bodri, B., *et al.*) 194(4): 325-336
— Tertiary geothermal events around the Japan Arc
(Itoh, Yasuto) 198(1): 123-128
maps: Magnetic model of the subduction zone in the Northeast Japan Arc
(Okubo, Yasukuni, *et al.*) 192(1-2): 103-115
plate tectonics: Magnetic model of the subduction zone in the Northeast Japan Arc
(Okubo, Yasukuni, *et al.*) 192(1-2): 103-115
— Three-dimensional Q structure beneath the Kanto-Tokai District, Japan
(Sekiguchi, S.) 195(1): 83-104

joints *see under* style *under* fractures

Jurassic *see also under* stratigraphy *under* California; China

Kenya—geophysical surveys
surveys: Crustal structure and tectonic evolution of the Anza Rift, northern Kenya
(Greene, L. C., *et al.*) 197(2-4): 203-211

Kenya—seismology
earthquakes: Strike-slip faulting in continental rifts; examples from Sabukia, East Africa (1928), and other regions
(Doser, Diane Irene, *et al.*) 197(2-4): 213-224

Kenya—tectonophysics
crust: A comparative study of the Rio Grande and Kenya rifts
(Keller, G. Randy, *et al.*) 197(2-4): 355-371
— Crustal structure and tectonic evolution of the Anza Rift, northern Kenya
(Greene, L. C., *et al.*) 197(2-4): 203-211

Korea—seismology
earthquakes: Body-wave analysis for shallow intraplate earthquakes in the Korean Peninsula and Yellow Sea
(Jun, Myung-Soon) 192(3-4): 345-357

Korea—structural geology
orogeny: Indosinian dextral ductile fault system and synkinematic plutonism in the southwest of the Ogcheon Belt (South Korea)
(Cluzel, D., *et al.*) 194(1-2): 131-151

landform evolution *see under* geomorphology

lava *see also* igneous rocks; magmas

lava—distribution
rift zones: The position of continental flood basalts in rift zones and its bearing on models of rifting
(Kazmin, V. G.) 199(2-4): 375-387

lava—geochemistry
trace elements: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180
— Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317

lava—petrology
lava flows: Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202

lava—properties
mechanical properties: Experimental deformation of a glassy basalt
(Hacker, Bradley R., *et al.*) 200(1-3): 79-96
— Structure and development of the Sveinagja Graben, Northeast Iceland
(Gudmundsson, Agust, *et al.*) 200(1-3): 111-125

Levant *see* Middle East

lineation *see also* foliation; structural analysis

lineation—interpretation
orientation: Factors controlling slip-lineation orientation on thrust-fault planes
(Wilkerson, M. Scott, *et al.*) 196(1-2): 203-208

liquid inclusions *see* fluid inclusions

magmas *see also* igneous rocks; intrusions; lava

magmas—evolution
magmatic associations: Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
passive margins: Tectonic development of passive continental margins of the southern and central Red Sea with a comparison to Wilkes Land, Antarctica
(Bohannon, Robert G., *et al.*) 198(2-4): 129-154
rift zones: Backarc extension versus continental breakup; petrological aspects for active rifting
(Tatsumi, Yoshiyuki, *et al.*) 197(2-4): 127-137
— Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354
— Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201
rifting: High-Ti continental tholeiites from the Aznam Trough, northwestern Saudi Arabia; evidence of "abortive" rifting in the "embryonic" stage of Red Sea opening
(Suayah, Ismail B., *et al.*) 191(1-2): 75-87
volcanism: Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202

magmas—genesis
hybridization: Emplacement and deformation of granitoids during volcanic arc construction in the Foothills Terrane, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 191(1-2): 89-110
partial melting: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180
plate collision: Genesis of a Variscan batholith; field, petrological and mineralogical evidence from the Corsica–Sardinia Batholith
(Rossi, Philippe, *et al.*) 195(2-4): 319-346

magnetic surveys *see under* geophysical surveys *under* Arctic Ocean; Nigeria; Pacific Ocean; Red Sea; Sardinia; Spain; Turkey

magnetism of rocks and minerals *see* paleomagnetism

Malawi—structural geology
structural analysis: Post-Pan-African tectonic evolution of South Malawi in relation to the Karroo and Recent East African Rift systems
(Castaing, C.) 191(1-2): 55-73

Malaysia—stratigraphy
Neogene: Neogene arc-continent collision in Sabah, northern Borneo (Malaysia) [discussion and reply]
(Hutchison, Charles S., *et al.*) 200(1-3): 325-332

Malaysia—tectonophysics
plate tectonics: Neogene arc-continent collision in Sabah, northern Borneo (Malaysia) [discussion and reply]
(Hutchison, Charles S., *et al.*) 200(1-3): 325-332

mantle *see also under* seismology *under* Japan; Scandinavia; *see also under* tectonophysics *under* Alps; Italy; Switzerland; Tyrrhenian Sea

mantle—processes
convection: Hot-field tectonics
(Zonenshain, L. P., *et al.*) 199(2-4): 165-192
— Planetary evolution and global tectonics
(Monin, A. S.) 199(2-4): 149-164
heat flow: A heat production model of the crust and upper mantle
(Cermak, Vladimir, *et al.*) 194(4): 307-323
plumes: Backarc extension versus continental breakup; petrological aspects for active rifting
(Tatsumi, Yoshiyuki, *et al.*) 197(2-4): 127-137

mantle—properties
buoyancy: Entrainment in compositionally buoyant plumes
(Neavel, Kenneth E., *et al.*) 200(1-3): 1-15

maps *see also under* geophysical surveys *under* Arctic Ocean; Europe; *see also under* seismology *under* USSR; *see also under* structural geology *under* Asia; *see also under* tectonophysics *under* Canada; Canadian Shield; Japan; Red Sea region; Scandinavia

Mediterranean region *see also* the individual countries; Corsica; Sardinia

Mediterranean region—structural geology
faults: Neogene tectonostratigraphy and kinematics of Calabrian basins; implications for the geodynamics of the central Mediterranean
(van Dijk, Janpieter, *et al.*) 196(1-2): 23-60
geosynclines: Geodynamic evolution of the Hercynian Sardinian-Corsican Massif; the relationships with the Calabrian-Peloritan Arc
(Minzoni, N.) 191(3-4): 429-430

Mediterranean region—tectonophysics
crust: Crustal structure variations and transcurrent faulting at the eastern and western margins of the eastern Mediterranean
(Ben-Avraham, Zvi, *et al.*) 196(3-4): 269-277
— Tectonic nappes and horizontal layering of the Earth's crust in the Mediterranean Belt (Carpathians, Balkanides and Caucasus)
(Gamkrelidze, I. P.) 196(3-4): 385-396
plate tectonics: Internal structure of the Adra Nappe (Alpujarride Complex, Betics, Spain)
(Cuevas, Julia) 200(1-3): 199-212
— Source mechanisms of Recent earthquakes in the Hellenic Arc from broadband data
(Liakopoulou, F., *et al.*) 200(1-3): 233-248
— The movement across the Nevado-Filabride shear zones and the convergence of Europe and Africa (Betic Orogen)
(Garcia-Duenas, V., *et al.*) 191(3-4): 420

Mediterranean Sea *see also* Corsica; Ionian Sea; Sardinia; Tyrrhenian Sea
Mediterranean Sea—oceanography
ocean floors: Rate of outward growth of the Mediterranean Ridge accretionary complex
(Kastens, Kim A.) 199(1): 25-50
Mediterranean Sea—structural geology
neotectonics: Some aspects of the Recent tectonics in the Strait of Messina, Italy
(Montenat, Christian, *et al.*) 194(3): 203-215
Mediterranean Sea—tectonophysics
plate tectonics: Neogene tectonostratigraphy and kinematics of Calabrian basins; implications for the geodynamics of the central Mediterranean
(van Dijk, Janpieter, *et al.*) 196(1-2): 23-60
— Rate of outward growth of the Mediterranean Ridge accretionary complex
(Kastens, Kim A.) 199(1): 25-50
meetings *see* symposia
Mesozoic *see also under* stratigraphy *under* Tunisia
metamorphic rocks *see also* igneous rocks; metamorphism
metamorphic rocks—amphibolites
textures: Complete seismic properties obtained from microcrack fabrics and textures in an amphibolite from the Ivrea Zone, Western Alps, Italy
(Siegesmund, S., *et al.*) 199(1): 13-24
metamorphic rocks—eclogite
textures: Deformation and recrystallization mechanisms in naturally deformed omphacites from the Sesia-Lanzo Zone; geophysical consequences
(Buatier, M., *et al.*) 195(1): 11-27
metamorphic rocks—facies
amphibolite facies: Petrophysical properties of a prograde amphibolite-granulite facies transition zone at Sigerfjord, Vesteralen, Northern Norway
(Olesen, Odleiv, *et al.*) 192(1-2): 33-39
metamorphic rocks—gneisses
granite gneiss: Aspects of the dynamic and thermal metamorphic history of the Vredefort cryptoexplosion structure; implications for its origin
(Hart, R. J., *et al.*) 192(3-4): 313-331
metamorphic rocks—metaigneous rocks
metaperidotite: Dehydration-induced fracturing of eclogite-facies peridotites; implications for the mechanical behaviour of subducting oceanic lithosphere
(Hoogerduijn Strating, E. H., *et al.*) 200(1-3): 187-198
metamorphic rocks—metasedimentary rocks
textures: Continuous deformation, ductile thrusting and backfolding of cover and basement in the Sierra de Guadarrama, Hercynian Orogen of central Spain
(Macaya, J., *et al.*) 191(3-4): 291-309
metamorphic rocks—mineral assemblages
opaque minerals: Petrophysical data and opaque mineralogy of high-grade and retrogressed lithologies; implications for the interpretation of aeromagnetic anomalies in northern Vestranden, central Norway
(Skilbrei, Jan Reidar, *et al.*) 192(1-2): 21-31
zoning: Opposite P, T, t paths of Hercynian metamorphism between the upper units of the Cabo Ortegal Complex and their substratum (northwest of the Iberian Massif)
(Arenas, R.) 191(3-4): 347-364
metamorphic rocks—mylonites
pseudotachylite: Petrology of pseudotachylytes from the Alpine Fault of New Zealand
(Bossiere, G.) 196(1-2): 173-193
textures: Extensional tectonics of the Toledo ductile–brittle shear zone, central Iberian Massif
(Hernandez Enrile, J. L.) 191(3-4): 311-324
metamorphic rocks—petrography
metamorphic belts: Structural and metamorphic evolution of the Almaden de la Plata Core (Seville, Spain) in relation to syn-metamorphic shear between the Ossa-Morena and South Portuguese zones of the Iberian Variscan fold belt
(Abalos Villaro, B., *et al.*) 191(3-4): 365-387
metamorphic rocks—properties
elastic properties: The effect of plagioclase textures on velocity anisotropy and shear wave splitting at deeper crustal levels
(Siegesmund, S., *et al.*) 191(1-2): 147-154
metamorphic rocks—quartzites
fabric: The effect of porosity on the strength of quartz aggregates experimentally deformed in the dislocation creep regime
(Hirth, Greg, *et al.*) 200(1-3): 97-110
textures: Initiation of cataclastic flow and development of cataclastic foliation in nonporous quartzites from a natural fault zone
(Babaie, Hassan A., *et al.*) 200(1-3): 67-77
metamorphic rocks—slates
fabric: Determination of March strain from phyllosilicate preferred orientation; a semi-numerical method
(Chen, Richard T., *et al.*) 200(1-3): 173-185
— On the origin of the magnetic fabric in purple Cambrian slates of North Wales
(Jackson, Mike, *et al.*) 194(1-2): 49-58
properties: A study of colour changes in purple–green slate by petrological and rock-magnetic methods
(Borradaile, Graham John, *et al.*) 200(1-3): 157-172
metamorphic rocks—textures
fabric: Strains and structures associated with a terrane bounding stretching fault; the Melones fault zone, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 194(1-2): 69-90
metamorphism *see also* metamorphic rocks
metamorphism—evolution
orogenic belts: The overprint of the Alpine tectono-metamorphic evolution on the Hercynian Orogen; an example from the Apuane Alps (Northern Apennines, Italy)
(Conti, P., *et al.*) 191(3-4): 335-346
metamorphism—grade
high-grade metamorphism: Petrophysical data and opaque mineralogy of high-grade and retrogressed lithologies; implications for the interpretation of aeromagnetic anomalies in northern Vestranden, central Norway
(Skilbrei, Jan Reidar, *et al.*) 192(1-2): 21-31
metamorphism—P-T conditions
changes: Experimental deformation of a glassy basalt
(Hacker, Bradley R., *et al.*) 200(1-3): 79-96
geologic barometry: Cadomian subduction/collision and Variscan transpression in the Badajoz–Cordoba shear belt, Southwest Spain
(Abalos, B., *et al.*) 199(1): 51-72
nappes: Internal structure of the Adra Nappe (Alpujarride Complex, Betics, Spain)
(Cuevas, Julia) 200(1-3): 199-212
metamorphism—polymetamorphism
cryptoexplosion features: Aspects of the dynamic and thermal metamorphic history of the Vredefort cryptoexplosion structure; implications for its origin
(Hart, R. J., *et al.*) 192(3-4): 313-331
metamorphism—prograde metamorphism
isograds: Petrophysical properties of a prograde amphibolite-granulite facies transition zone at Sigerfjord, Vesteralen, Northern Norway
(Olesen, Odleiv, *et al.*) 192(1-2): 33-39

metamorphism—regional metamorphism
orogenic belts: Emplacement and deformation of granitoids during volcanic arc construction in the Foothills Terrane, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 191(1-2): 89-110
P-T conditions: Opposite P, T, t paths of Hercynian metamorphism between the upper units of the Cabo Ortegal Complex and their substratum (northwest of the Iberian Massif)
(Arenas, R.) 191(3-4): 347-364
metamorphism—retrograde metamorphism
P-T conditions: Structural and metamorphic evolution of the Almaden de la Plata Core (Seville, Spain) in relation to syn-metamorphic shear between the Ossa-Morena and South Portuguese zones of the Iberian Variscan fold belt
(Abalos Villaro, B., *et al.*) 191(3-4): 365-387
metasomatic rocks *see also* igneous rocks; metamorphic rocks; metamorphism
metasomatic rocks—serpentinite
evolution: Petrology of serpentine sandstone as a key to tectonic development of serpentine belts
(Arai, S., *et al.*) 195(1): 65-81
metasomatism *see also* metamorphism; metasomatic rocks
Mexico—tectonophysics
crust: Aeromagnetic anomalies and paleomagnetism in Jalisco and Michoacan, southern Mexico continental margin
(Alva-Valdivia, L. M., *et al.*) 192(1-2): 169-190
Middle East *see also* Israel; Turkey
Middle East—geophysical surveys
seismic surveys: Active compressional tectonics in the Jericho area, Dead Sea Rift
(Rotstein, Y., *et al.*) 198(2-4): 239-259
Middle East—structural geology
neotectonics: Active compressional tectonics in the Jericho area, Dead Sea Rift
(Rotstein, Y., *et al.*) 198(2-4): 239-259
— The Dead Sea Rift; from continental rift to incipient ocean
(Mart, Yossi) 197(2-4): 155-179
mineral resources *see also* the individual deposits
minerals *see also* crystal growth
Mississippi Valley—geophysical surveys
seismic surveys: A COCORP deep reflection profile across the buried Reelfoot Rift, south-central United States
(Nelson, K. D., *et al.*) 197(2-4): 271-293
Mohorovicic discontinuity *see also* crust; mantle
Morocco—environmental geology
geologic hazards: The effects of the November 1, 1755 "Lisbon" earthquake in Morocco
(Levret, A.) 193(1-3): 83-94
mud volcanoes *see also* volcanology; *see also under* geomorphology *under* Apennines
Namibia—tectonophysics
crust: A synthesis of the structural geology of a major tectonic boundary between a 1000 m.y. mobile belt and a 3000 m.y. craton
(Van Bever Donker, J. M.) 196(3-4): 359-370
nappes *see under* orientation *under* folds
neodymium—isotopes
Nd-144/Nd-143: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358
— Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
Neogene *see also under* stratigraphy *under* Malaysia
neotectonics *see also under* structural geology *under* Alps; China; data processing; France; Germany; Haiti; Hungary; Idaho; Italy; Mediterranean Sea; Middle East; North Sea; Scandinavia; symposia; Turkey; USSR
New Mexico—geochemistry
trace elements: Thermal and kinematic model of the southern Rio Grande Rift; inferences from crustal and mantle xenoliths from Kilbourne Hole, New Mexico
(Bussod, Gilles Y. A., *et al.*) 197(2-4): 373-389
New Mexico—geophysical surveys
heat flow: Heat flow on the southern Colorado Plateau
(Minier, Jeffrie, *et al.*) 200(1-3): 51-66
New Mexico—tectonophysics
crust: Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354
heat flow: Thermal and kinematic model of the southern Rio Grande Rift; inferences from crustal and mantle xenoliths from Kilbourne Hole, New Mexico
(Bussod, Gilles Y. A., *et al.*) 197(2-4): 373-389
New Zealand—petrology
metamorphic rocks: Petrology of pseudotachylytes from the Alpine Fault of New Zealand
(Bossiere, G.) 196(1-2): 173-193
Nigeria—geophysical surveys
magnetic surveys: Magnetic anomalies in the Nigerian continental mass based on aeromagnetic surveys
(Ajakiaye, D. E., *et al.*) 192(1-2): 211-230
Nigeria—tectonophysics
crust: Magnetic anomalies in the Nigerian continental mass based on aeromagnetic surveys
(Ajakiaye, D. E., *et al.*) 192(1-2): 211-230
noble gases *see also* radon
North America *see also* Appalachians; Canada; Mexico; Rocky Mountains
North America—tectonophysics
crust: A comparative study of the Rio Grande and Kenya rifts
(Keller, G. Randy, *et al.*) 197(2-4): 355-371
isostasy: Continental rift structures and dynamics with reference to teleseismic studies of the Rio Grande and East African rifts
(Davis, Paul M.) 197(2-4): 309-325
North Sea—structural geology
neotectonics: Lithospheric dynamics and the rapid Pliocene-Quaternary subsidence phase in the southern North Sea basin
(Kooi, Henk, *et al.*) 192(3-4): 245-259
North Sea—tectonophysics
crust: Lithospheric dynamics and the rapid Pliocene-Quaternary subsidence phase in the southern North Sea basin
(Kooi, Henk, *et al.*) 192(3-4): 245-259
Northern Hemisphere *see also* Africa; Arctic Ocean; Asia; Atlantic Ocean; Europe; North America; Pacific Ocean; USSR
Northwest Territories—stratigraphy
Proterozoic: Seismic reflection trace synthesized from Proterozoic outcrop and its correlation to seismic profiles in northwestern Canada
(Cook, Frederick A., *et al.*) 191(1-2): 111-126
Norway—petrology
metamorphic rocks: Petrophysical data and opaque mineralogy of high-grade and retrogressed lithologies; implications for the interpretation of aeromagnetic anomalies in northern Vestranden, central Norway
(Skilbrei, Jan Reidar, *et al.*) 192(1-2): 21-31

metamorphism: Petrophysical properties of a prograde amphibolite-granulite facies transition zone at Sigerfjord, Vesteralen, Northern Norway
(Olesen, Odleiv, *et al.*) 192(1-2): 33-39
Norway—seismology
earthquakes: Periodicity in seismicity; examination of four catalogs
(Lindholm, Conrad D., *et al.*) 191(1-2): 155-164
ocean floors *see also under* oceanography *under* Atlantic Ocean; Indian Ocean; Mediterranean Sea
ophiolite *see under* ultramafics *under* igneous rocks
Oregon—geophysical surveys
geodesy: Horizontal deformation in the Cascadia subduction zone as derived from serendipitous geodetic data
(Snay, Richard A., *et al.*) 194(1-2): 59-67
orogeny—evolution
Alpine Orogeny: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232
— The overprint of the Alpine tectono-metamorphic evolution on the Hercynian Orogen; an example from the Apuane Alps (Northern Apennines, Italy)
(Conti, P., *et al.*) 191(3-4): 335-346
Hercynian Orogeny: Accretionary history and crustal evolution of the Variscan Belt in Western Europe
(Matte, Philippe) 196(3-4): 309-337
— Late Hercynian extensional and transcurrent tectonics in central Iberia
(Doblas, Miguel) 191(3-4): 325-334
orogenic belts: Structures in Southwest Asia and evolution of the eastern Tethys
(Boulin, Jean) 196(3-4): 211-268
— Tectonics of the Verkhoyansk–Kolyma Mesozoides in the context of plate tectonics
(Parfenov, L. M.) 199(2-4): 319-342
plate convergence: Supracrustal structural record of plate convergence
(Jaros, Josef) 196(3-4): 397-411
orogeny—mechanism
Alpine Orogeny: Some constraints on the kinematics of the Tertiary Piemonte Basin (Northwest Italy)
(Hoogerduijn Strating, E. H., *et al.*) 198(1): 47-51
Cadomian Orogeny: Cadomian subduction/collision and Variscan transpression in the Badajoz–Cordoba shear belt, Southwest Spain
(Abalos, B., *et al.*) 199(1): 51-72
Hercynian Orogeny: Continuous deformation, ductile thrusting and backfolding of cover and basement in the Sierra de Guadarrama, Hercynian Orogen of central Spain
(Macaya, J., *et al.*) 191(3-4): 291-309
— Crustal thickening and deformation sequence in the footwall to the suture of the Variscan Belt of Northwest Spain
(Perez-Estaun, A., *et al.*) 191(3-4): 243-253
— Genesis of a Variscan batholith; field, petrological and mineralogical evidence from the Corsica–Sardinia Batholith
(Rossi, Philippe, *et al.*) 195(2-4): 319-346
— Opposite P, T, t paths of Hercynian metamorphism between the upper units of the Cabo Ortegal Complex and their substratum (northwest of the Iberian Massif)
(Arenas, R.) 191(3-4): 347-364
— Persistent basement wrenching as controlling mechanism of Variscan thin-skinned thrusting and sedimentation, Cantabrian Mountains, Spain [discussion and reply]
(Alonso, J. L., *et al.*) 194(1-2): 171-182
Himalayan Orogeny: Indian Plate motion and shape; constraints on the geometry of the Himalayan Orogen
(Treloar, Peter J., *et al.*) 191(3-4): 189-198
Ketilidian Orogeny: Early Proterozoic collision tectonics, and rapakivi granites as intrusions in an extensional thrust-thickened crust; the Ketilidian Orogen, South Greenland
(Windley, Brian F.) 195(1): 1-10
Nevadan Orogeny: Relationships between kinematics of arc–continent collision and kinematics of thrust faults, folds, shear zones, and foliations in the Nevadan Orogen, northern Sierra Nevada, California
(Edelman, Steven H.) 191(3-4): 223-236
plate tectonics: A critical review of tectonic processes at continental margin orogens
(Edelman, Steven H.) 191(3-4): 199-212
P-T conditions *see under* fluid inclusions; metamorphism; *see under* regional metamorphism *under* metamorphism; *see under* retrograde metamorphism *under* metamorphism
Pacific Coast *see also* the individual states and provinces
Pacific Ocean *see also* Bering Sea; Philippine Sea; South China Sea; Yellow Sea
Pacific Ocean—geophysical surveys
magnetic surveys: Magnetic model of the subduction zone in the Northeast Japan Arc
(Okubo, Yasukuni, *et al.*) 192(1-2): 103-115
seismic surveys: Deep seismic crustal structure beneath the Bonin Trough
(Hino, Ryota, *et al.*) 200(1-3): 249-266
Pacific Ocean—tectonophysics
crust: Aeromagnetic anomalies and paleomagnetism in Jalisco and Michoacan, southern Mexico continental margin
(Alva-Valdivia, L. M., *et al.*) 192(1-2): 169-190
— Deep seismic crustal structure beneath the Bonin Trough
(Hino, Ryota, *et al.*) 200(1-3): 249-266
— Magnetic model of the subduction zone in the Northeast Japan Arc
(Okubo, Yasukuni, *et al.*) 192(1-2): 103-115
plate tectonics: Horizontal deformation in the Cascadia subduction zone as derived from serendipitous geodetic data
(Snay, Richard A., *et al.*) 194(1-2): 59-67
— Stress tensor analysis in the Taiwan area from focal mechanisms of earthquakes
(Yeh, Yih-Hsiung, *et al.*) 200(1-3): 267-280
sea-floor spreading: Constraints on rift propagation history at the Cobb Offset, Juan de Fuca Ridge, from numerical modeling of tectonic fabric
(Shoberg, Tom, *et al.*) 197(2-4): 295-308
Pacific region *see also* the individual countries
Paleocene *see also under* geochronology *under* Japan
paleoclimatology—Paleozoic
China: Paleoclimatic and paleomagnetic constraints on the Paleozoic reconstructions of South China, North China and Tarim
(Nie Shangyou) 196(3-4): 279-308
paleogeography—Holocene
Saudi Arabia: High-resolution ^{14}C dating of uplifted Holocene shoreline in eastern Saudi Arabia
(Vita-Finzi, C., *et al.*) 194(3): 197-201
paleogeography—Mesozoic
Europe: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232
paleogeography—Permian
Europe: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232

paleogeography—Tertiary
Turkey: Tertiary evolution of the Sivas Basin, central Turkey
(Cater, J. M. L., *et al.*) 195(1): 29-46
paleogeography—Triassic
Korea: Indosinian dextral ductile fault system and synkinematic plutonism in the southwest of the Ogcheon Belt (South Korea)
(Cluzel, D., *et al.*) 194(1-2): 131-151
paleomagnetism—Cambrian
Wales: On the origin of the magnetic fabric in purple Cambrian slates of North Wales
(Jackson, Mike, *et al.*) 194(1-2): 49-58
paleomagnetism—Carboniferous
China: Paleomagnetic results from the Upper Carboniferous of the Shan-Thai-Malay Block of western Yunnan, China
(Huang Kainian, *et al.*) 192(3-4): 333-344
paleomagnetism—interpretation
magnetic anomalies: Aeromagnetic anomalies and paleomagnetism in Jalisco and Michoacan, southern Mexico continental margin
(Alva-Valdivia, L. M., *et al.*) 192(1-2): 169-190
— Definition of the continent-ocean boundary of India and the surrounding oceanic regions from Magsat data
(Singh, B. P., *et al.*) 192(1-2): 145-151
— Investigation of plate boundaries in the eastern Indian Ocean using Magsat data
(Taylor, Patrick T.) 192(1-2): 153-158
— Magnetic anomalies at satellite altitude over continent-ocean boundaries
(Hayling, Kjell L.) 192(1-2): 129-143
— Magnetic expressions of intrusions including magnetic aureoles
(Schwarz, Erik J.) 192(1-2): 191-200
— Mean magnetic contrasts between oceans and continents
(Hinze, W. J., *et al.*) 192(1-2): 117-127
— Petrophysical data and opaque mineralogy of high-grade and retrogressed lithologies; implications for the interpretation of aeromagnetic anomalies in northern Vestranden, central Norway
(Skilbrei, Jan Reidar, *et al.*) 192(1-2): 21-31
rotation: Penninic windows at the eastern end of the Alps and their relation to the intra-Carpathian basins [discussion and reply]
(Marton, Emo, *et al.*) 194(1-2): 183-186
spreading centers: Constraints on rift propagation history at the Cobb Offset, Juan de Fuca Ridge, from numerical modeling of tectonic fabric
(Shoberg, Tom, *et al.*) 197(2-4): 295-308
paleomagnetism—Jurassic
California: Concordant paleolatitudes from ophiolite sequences in the Northern California Coast Ranges, U.S.A.
(Mankinen, Edward A., *et al.*) 198(1): 1-21
China: Paleomagnetism of Jurassic rocks from southwestern Sichuan and the timing of the closure of the Qinling Suture
(Huang Kainian, *et al.*) 200(1-3): 299-316
paleomagnetism—magnetic susceptibility
experimental studies: The magnetic fabrics of experimentally deformed artificial clay–water dispersions
(Richter, Carl, *et al.*) 200(1-3): 143-155
lithosphere: Lithospheric magnetic property contrasts within the South American Plate derived from damped least-squares inversion of satellite magnetic data
(Ravat, D. N., *et al.*) 192(1-2): 159-168
oceanic crust: Susceptibility and Koenigsberger ratio of the oceanic crust deduced from magnetic reversals southeast of the Agulhas Bank
(Day, R. W., *et al.*) 192(1-2): 97-101
rotation: Rotations in the northeastern collision belt of Taiwan; preliminary results from paleomagnetism
(Lee, Teh-Quei, *et al.*) 199(1): 109-120
slates: A study of colour changes in purple–green slate by petrological and rock-magnetic methods
(Borradaile, Graham John, *et al.*) 200(1-3): 157-172
transition zones: Petrophysical properties of a prograde amphibolite-granulite facies transition zone at Sigerfjord, Vesteralen, Northern Norway
(Olesen, Odleiv, *et al.*) 192(1-2): 33-39
paleomagnetism—Paleocene
Turkey: Paleomagnetic constraints on the tectonic evolution of the Sakarya Continent, northwestern Anatolia [discussion and reply]
(Saribudak, Mustafa, *et al.*) 200(1-3): 317-323
paleomagnetism—Paleozoic
China: Paleoclimatic and paleomagnetic constraints on the Paleozoic reconstructions of South China, North China and Tarim
(Nie Shangyou) 196(3-4): 279-308
paleomagnetism—Phanerozoic
Scandinavia: Catalogue of palaeomagnetic directions and poles from Fennoscandia; Archaean to Tertiary
(Pesonen, L. J., *et al.*) 195(2-4): 151-207
paleomagnetism—Precambrian
Scandinavia: Catalogue of palaeomagnetic directions and poles from Fennoscandia; Archaean to Tertiary
(Pesonen, L. J., *et al.*) 195(2-4): 151-207
— Petrophysical properties (density and magnetization) of rocks from the northern part of the Baltic Shield
(Henkel, Herbert) 192(1-2): 1-19
paleomagnetism—remanent magnetization
thermoremanent magnetization: Thermoremanent magnetization of the oceanic lithosphere inferred from a thermal evolution model; implications for the source of marine magnetic anomalies
(Arkani-Hamed, J.) 192(1-2): 81-96
Paleozoic *see also under* stratigraphy *under* China
Pennsylvania—structural geology
deformation: Fluid evolution history of brittle-ductile shear zones on the hanging wall of Yellow Spring Thrust, Valley and Ridge Province, Pennsylvania, U.S.A.
(Srivastava, D. C., *et al.*) 198(1): 23-34
Philippine Sea—tectonophysics
plate tectonics: Ductile deformation and Miocene nappe-stacking in Taiwan related to motion of the Philippine Sea Plate
(Faure, M., *et al.*) 198(1): 95-105
physical geography *see* geomorphology
plate tectonics *see also under* tectonophysics *under* Africa; Antarctica; Asia; Atlantic region; Australia; Barbados; Brazil; California; Caribbean region; data processing; Europe; Greenland; Iceland; India; Indian Ocean; Japan; Malaysia; Mediterranean region; Mediterranean Sea; Pacific Ocean; Philippine Sea; Portugal; Red Sea region; South China Sea; Spain; symposia; Taiwan; Turkey; USSR
plate tectonics—concepts
hot spots: Hot-field tectonics
(Zonenshain, L. P., *et al.*) 199(2-4): 165-192
plate tectonics—effects
metamorphism: Evolution of a metamorphic belt; a consequence of arc-continent collision?
(Morand, V. J., *et al.*) 191(3-4): 431-432
orogenic belts: A critical review of tectonic processes at continental margin orogens
(Edelman, Steven H.) 191(3-4): 199-212

plate tectonics—evolution
plate collision: Syn-sedimentary extension; paleostress and model of shortening of a passive margin activated by collision
(Stel, H.) 191(3-4): 442
plate convergence: Supracrustal structural record of plate convergence
(Jaros, Josef) 196(3-4): 397-411
plate tectonics—mechanism
convection: Planetary evolution and global tectonics
(Monin, A. S.) 199(2-4): 149-164
geodynamics: A two-level concept of plate tectonics; application to geodynamics
(Lobkovsky, L. I., *et al.*) 199(2-4): 343-374
interpretation: An application of the slip model of brittle deformation to focal mechanism analysis in three different plate tectonic situations
(Capote, R., *et al.*) 191(3-4): 399-409
plate collision: Collision and rifting in the Tethys Ocean; geodynamic implications
(Kazmin, V. G.) 196(3-4): 371-384
stress: Ridge push and associated plate interior stress in normal and hot spot regions
(Bott, M. H. P.) 200(1-3): 17-32
transpression: Displacement-strain relations in linear tectonic zones
(Durney, D. W.) 191(3-4): 417
plate tectonics—processes
eduction: Mantle eduction, a second order process in plate tectonics
(Fyfe, W. S., *et al.*) 191(3-4): 419
seismotectonics: Analysis of seismotectonic processes in subduction zones from the standpoint of a keyboard model of great earthquakes
(Lobkovsky, L. I., *et al.*) 199(2-4): 211-236
plate tectonics—rifting
mechanism: Backarc extension versus continental breakup; petrological aspects for active rifting
(Tatsumi, Yoshiyuki, *et al.*) 197(2-4): 127-137
— Lithospheric thinning, uplift, and heat flow preceding rifting
(Mareschal, Jean-Claude, *et al.*) 197(2-4): 117-126
— Mechanism of rifting; considerations based on results of physical modelling and on geological and geophysical data
(Malkin, B. V., *et al.*) 199(2-4): 193-210
— The position of continental flood basalts in rift zones and its bearing on models of rifting
(Kazmin, V. G.) 199(2-4): 375-387
— World rift systems
(Gangi, A. F.) 197(2-4): 99-389
plate tectonics—subduction
effects: Subduction tectonic erosion leading to fore-arc (imbricate) collapse; a major process with implications for terrane juxtaposition
(Osmaston, M. F.) 191(3-4): 434
plutons *see under* intrusions
Portugal—petrology
metamorphism: Structural and metamorphic evolution of the Almaden de la Plata Core (Seville, Spain) in relation to syn-metamorphic shear between the Ossa-Morena and South Portuguese zones of the Iberian Variscan fold belt
(Abalos Villaro, B., *et al.*) 191(3-4): 365-387
Portugal—seismology
earthquakes: The effects of the November 1, 1755 "Lisbon" earthquake in Morocco
(Levret, A.) 193(1-3): 83-94
Portugal—structural geology
deformation: Finite strain analysis in a transpressive regime (Variscan Autochthon, Northeast Portugal)
(Dias, R., *et al.*) 191(3-4): 389-397
orogeny: Late Hercynian extensional and transcurrent tectonics in central Iberia
(Doblas, Miguel) 191(3-4): 325-334
— Tectonostratigraphic terranes and the geodynamic evolution of the Iberian Variscan fold belt
(Ribeiro, A., *et al.*) 191(3-4): 438-439
Portugal—tectonophysics
plate tectonics: Flake tectonics in the Northwest Iberian Variscides
(Ribeiro, A., *et al.*) 191(3-4): 437
Proterozoic *see also under* stratigraphy *under* Northwest Territories
Pyrenees *see also* France; Spain
Quaternary *see also under* geochronology *under* Italy
Quebec—tectonophysics
paleomagnetism: Magnetic expressions of intrusions including magnetic aureoles
(Schwarz, Erik J.) 192(1-2): 191-200
Queensland—structural geology
structural analysis: Geometry of a middle Proterozoic extensional decollement in northeastern Australia
(Holcombe, R. J., *et al.*) 191(3-4): 255-274
radioactive dating *see* absolute age
radiocarbon dating *see* absolute age
radon—isotopes
Rn-222: Earthquake forerunners in a selected area of northern Italy; recent developments in automatic geochemical monitoring
(Martinelli, G., *et al.*) 193(4): 397-410
rare earths *see also* neodymium
rare earths—geochemistry
volcanic rocks: Early Mesozoic oceanic subduction-related volcanic rocks, Pindos Basin, Greece
(Pe-Piper, Georgia, *et al.*) 192(3-4): 273-292
— Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
xenoliths: Crustal xenoliths from Cenozoic volcanic fields of West Germany; implications for structure and composition of the continental crust
(Mengel, K., *et al.*) 195(2-4): 271-289
Red Sea—geophysical surveys
magnetic surveys: 3-D inversion of deep tow magnetic data on the Atlantis II Deep (Red Sea); hydrothermal and geodynamic interpretation
(le Quentrec, M. F., *et al.*) 198(2-4): 421-439
seismic surveys: Contrasting structural styles of the eastern and western margins of the southern Red Sea; the 1988 SONNE experiment
(Egloff, Frank, *et al.*) 198(2-4): 329-353
— Seismic surveys in the northern Red Sea; asymmetric crustal structure
(Rihm, Roland, *et al.*) 198(2-4): 279-295
surveys: Geophysical observations offshore Saudi Arabia; seismic and magnetic measurements
(Richter, Helmut, *et al.*) 198(2-4): 297-310
Red Sea—seismology
earthquakes: Microearthquake activity in the Suakin Deep, Red Sea, and tectonic implications
(Makris, Jannis, *et al.*) 198(2-4): 411-420

Red Sea—structural geology
faults: Tiran Island; an internal block at the junction of the Red Sea Rift and Dead Sea transform
(Goldberg, M., *et al.*) 198(2-4): 261-273
Red Sea—tectonophysics
crust: Microearthquake activity in the Suakin Deep, Red Sea, and tectonic implications
(Makris, Jannis, *et al.*) 198(2-4): 411-420
— The case for ocean crust beneath the Red Sea
(Girdler, R. W.) 198(2-4): 275-278
— The gravity field of the Red Sea and East Africa
(Makris, Jannis, *et al.*) 198(2-4): 369-381
— The structural setting of the Red Sea axial valley and deeps; implications for crustal thinning processes
(Coutelle, A., *et al.*) 198(2-4): 395-409
— 3-D inversion of deep tow magnetic data on the Atlantis II Deep (Red Sea); hydrothermal and geodynamic interpretation
(le Quentrec, M. F., *et al.*) 198(2-4): 421-439
heat flow: Heatflow density distribution in the Red Sea
(Makris, Jannis, *et al.*) 198(2-4): 383-393
sea-floor spreading: High-Ti continental tholeiites from the Aznam Trough, northwestern Saudi Arabia; evidence of "abortive" rifting in the "embryonic" stage of Red Sea opening
(Suayah, Ismail B., *et al.*) 191(1-2): 75-87
— Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201
— Red Sea; birth and early history of a new oceanic basin
(Makris, Jannis, *et al.*) 198(2-4): 129-466
— Shear-controlled evolution of the Red Sea; pull apart model
(Makris, Jannis, *et al.*) 198(2-4): 441-466
— Tectonic development of passive continental margins of the southern and central Red Sea with a comparison to Wilkes Land, Antarctica
(Bohannon, Robert G., *et al.*) 198(2-4): 129-154
Red Sea region—petrology
intrusions: Structure of Yemeni Miocene dike swarms, and emplacement of coeval granite plutons
(Mohr, Paul) 198(2-4): 203-221
magmas: Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202
volcanism: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180
— The Neogene ash-flow caldera of A'ithayn; an eruptive centre upon the Trap Series in central North Yemen
(Heyckendorf, K., *et al.*) 198(2-4): 223-238
Red Sea region—tectonophysics
crust: Contrasting structural styles of the eastern and western margins of the southern Red Sea; the 1988 SONNE experiment
(Egloff, Frank, *et al.*) 198(2-4): 329-353
— Crustal thinning in relationship to the evolution of the Afro–Arabian rift system; a review of seismic-refraction data
(Prodehl, Claus, *et al.*) 198(2-4): 311-327
— Geophysical observations offshore Saudi Arabia; seismic and magnetic measurements
(Richter, Helmut, *et al.*) 198(2-4): 297-310
— Seismic surveys in the northern Red Sea; asymmetric crustal structure
(Rihm, Roland, *et al.*) 198(2-4): 279-295
— Tectonic development of passive continental margins of the southern and central Red Sea with a comparison to Wilkes Land, Antarctica
(Bohannon, Robert G., *et al.*) 198(2-4): 129-154
— The Afro-Arabian rift system; an overview
(Girdler, R. W.) 197(2-4): 139-153
maps: Heatflow density distribution in the Red Sea
(Makris, Jannis, *et al.*) 198(2-4): 383-393
— The gravity field of the Red Sea and East Africa
(Makris, Jannis, *et al.*) 198(2-4): 369-381
plate tectonics: Active compressional tectonics in the Jericho area, Dead Sea Rift
(Rotstein, Y., *et al.*) 198(2-4): 239-259
— Evolution of eastern Afar and the Gulf of Tadjura
(Clin, M.) 198(2-4): 355-368
— Shear-controlled evolution of the Red Sea; pull apart model
(Makris, Jannis, *et al.*) 198(2-4): 441-466
— Tiran Island; an internal block at the junction of the Red Sea Rift and Dead Sea transform
(Goldberg, M., *et al.*) 198(2-4): 261-273
regional geology *see* areal geology under the appropriate area term
remote sensing *see also* geophysical methods; *see also under* geophysical surveys *under* India
reservoirs *see also under* engineering geology *under* India
reservoirs—dams
induced earthquakes: Seismicity pattern for earthquakes near Bhatsa Reservoir, India
(Srivastava, H. N., *et al.*) 196(1-2): 141-156
rift zones *see under* systems *under* faults
rock mechanics *see also* soil mechanics
rock mechanics—materials, properties
elastic properties: Complete seismic properties obtained from microcrack fabrics and textures in an amphibolite from the Ivrea Zone, Western Alps, Italy
(Siegesmund, S., *et al.*) 199(1): 13-24
Rocky Mountains *see also* the individual states and provinces
Rocky Mountains—structural geology
faults: Out-of-sequence thrusting at the leading edge of the McConnell Thrust, front ranges of the Rocky Mountains of Alberta, Canada
(Maurel, L. E.) 191(3-4): 428
Russia *see* USSR
Sahara *see also* the individual countries
salt tectonics—mechanism
theoretical studies: The effect of gravitational compaction on estimation of vertical salt structure growth
(Petersen, K.) 194(1-2): 35-48
sandstone *see also under* clastic rocks *under* sedimentary rocks
Sardinia—geophysical surveys
magnetic surveys: Aeromagnetic constraints on the geostructural interpretation of the southern part of the Sardinian Rift, Italy
(Balia, R., *et al.*) 195(2-4): 347-358
Sardinia—petrology
intrusions: Genesis of a Variscan batholith; field, petrological and mineralogical evidence from the Corsica–Sardinia Batholith
(Rossi, Philippe, *et al.*) 195(2-4): 319-346
Saudi Arabia—geochemistry
trace elements: High-Ti continental tholeiites from the Aznam Trough, northwestern Saudi Arabia; evidence of "abortive" rifting in the "embryonic" stage of Red Sea opening
(Suayah, Ismail B., *et al.*) 191(1-2): 75-87

Saudi Arabia—geochronology
Holocene: High-resolution ^{14}C dating of uplifted Holocene shoreline in eastern Saudi Arabia
(Vita-Finzi, C., *et al.*) 194(3): 197-201
Tertiary: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180

Saudi Arabia—stratigraphy
changes of level: High-resolution ^{14}C dating of uplifted Holocene shoreline in eastern Saudi Arabia
(Vita-Finzi, C., *et al.*) 194(3): 197-201

Saudi Arabia—tectonophysics
crust: Geophysical observations offshore Saudi Arabia; seismic and magnetic measurements
(Richter, Helmut, *et al.*) 198(2-4): 297-310

Scandinavia—geophysical surveys
seismic surveys: Crustal structure of the Fennoscandian Shield; a traveltime interpretation of the long-range FENNOLORA seismic refraction profile
(Guggisberg, B., *et al.*) 195(2-4): 105-137

Scandinavia—seismology
mantle: Deep structure of Fennoscandia from fundamental and higher mode dispersion of Rayleigh waves
(Calcagnile, Gildo) 195(2-4): 139-149

Scandinavia—stratigraphy
paleomagnetism: Catalogue of palaeomagnetic directions and poles from Fennoscandia; Archaean to Tertiary
(Pesonen, L. J., *et al.*) 195(2-4): 151-207

Scandinavia—structural geology
neotectonics: Glacial isostasy and long-term crustal movements in Fennoscandia with respect to lithospheric and asthenospheric processes and properties [discussion and reply]
(Wolf, Detlef, *et al.*) 195(2-4): 443-446

Scandinavia—tectonophysics
crust: Crustal structure of the Fennoscandian Shield; a traveltime interpretation of the long-range FENNOLORA seismic refraction profile
(Guggisberg, B., *et al.*) 195(2-4): 105-137
— Magnetic crustal structures in northern Fennoscandia
(Henkel, Herbert) 192(1-2): 57-79
heat flow: Temperature field modelling along the northern segment of the European Geotraverse and the Danish transition zone
(Baumann, Marlyse, *et al.*) 194(4): 387-407
isostasy: Glacial isostasy and long-term crustal movements in Fennoscandia with respect to lithospheric and asthenospheric processes and properties [discussion and reply]
(Wolf, Detlef, *et al.*) 195(2-4): 443-446
maps: Magnetic crustal structures in northern Fennoscandia
(Henkel, Herbert) 192(1-2): 57-79
paleomagnetism: Petrophysical properties (density and magnetization) of rocks from the northern part of the Baltic Shield
(Henkel, Herbert) 192(1-2): 1-19

sea-floor spreading *see also* continental drift; plate tectonics; *see also under* tectonophysics *under* Atlantic Ocean; Bering Sea; Indian Ocean; Pacific Ocean; Red Sea; symposia

sea-floor spreading—evolution
spreading centers: A formation and evolution of overlapping spreading centers (constrained on the basis of physical modelling)
(Shemenda, Alexander I., *et al.*) 199(2-4): 389-404

sea-floor spreading—mechanism
stress: Ridge push and associated plate interior stress in normal and hot spot regions
(Bott, M. H. P.) 200(1-3): 17-32

sedimentary rocks *see also* sedimentary structures; sedimentation

sedimentary rocks—clastic rocks
sandstone: Petrology of serpentine sandstone as a key to tectonic development of serpentine belts
(Arai, S., *et al.*) 195(1): 65-81

sedimentary rocks—lithofacies
provenance: Large-scale strike-slip displacement of the Drauzug and the Transdanubian Mountains in early Alpine history; evidence from Permo-Mesozoic facies belts
(Schmidt, Thomas, *et al.*) 200(1-3): 213-232

sedimentary rocks—lithostratigraphy
key beds: A COCORP deep reflection profile across the buried Reelfoot Rift, south-central United States
(Nelson, K. D., *et al.*) 197(2-4): 271-293
Tertiary: Tertiary evolution of the Sivas Basin, central Turkey
(Cater, J. M. L., *et al.*) 195(1): 29-46

sedimentary structures *see also* sedimentary rocks

sedimentary structures—soft sediment deformation
clastic dikes: Some aspects of the Recent tectonics in the Strait of Messina, Italy
(Montenat, Christian, *et al.*) 194(3): 203-215

sedimentation—controls
tectonic controls: Persistent basement wrenching as controlling mechanism of Variscan thin-skinned thrusting and sedimentation, Cantabrian Mountains, Spain [discussion and reply]
(Alonso, J. L., *et al.*) 194(1-2): 171-182
— Rate of outward growth of the Mediterranean Ridge accretionary complex
(Kastens, Kim A.) 199(1): 25-50

sedimentation—provenance
sandstone: Petrology of serpentine sandstone as a key to tectonic development of serpentine belts
(Arai, S., *et al.*) 195(1): 65-81

sediments *see also* sedimentary rocks; sedimentary structures; sedimentation

seismic surveys *see under* geophysical surveys *under* Alps; Germany; Ionian Sea; Italy; Middle East; Mississippi Valley; Pacific Ocean; Red Sea; Scandinavia; Sweden; Tunisia

seismology *see also* earthquakes

seismology—data processing
data bases: Some ideas for a databank of macroseismic data
(Postpischl, D., *et al.*) 193(1-3): 215-223

seismology—earthquakes
aftershocks: Comparison of the aftershock distribution and the fault plane size of the M 4.9 Kameoka earthquake on May 28, 1987, Japan
(Maeda, Naoki) 197(1): 55-71
— Seismotectonics of intermediate-depth earthquakes from properties of aftershock sequences
(Kisslinger, C., *et al.*) 197(1): 27-40
— Structure of the Warm Spring and northern Thousand Springs fault segments, Lost River fault zone, Idaho; possible effects on rupturing during the 1983 Borah Peak earthquake
(Bruhn, Ronald L., *et al.*) 200(1-3): 33-49
— Temporal characteristics of some earthquake sequences in Greece
(Latoussakis, J., *et al.*) 193(4): 299-310
focal mechanism: An application of the slip model of brittle deformation to focal mechanism analysis in three different plate tectonic situations
(Capote, R., *et al.*) 191(3-4): 399-409
— An estimate of the stress tensor in Sweden using earthquake focal mechanisms
(Henderson, Jeremy) 192(3-4): 231-244

— Analysis and interpretation of the heterogeneous rupture process; application of the empirical Green's function method and nonlinear inversion technique to large earthquakes
(Fukuyama, Eiichi) 197(1): 1-17
— Focal mechanism of an earthquake of Baroque age in the "Regno delle Due Sicilie" (southern Italy)
(Chiaruttini, C., *et al.*) 193(1-3): 195-203
— How geology can influence scaling relations
(Feignier, Bruno) 197(1): 41-53
— Modelling the earthquake source
(Scholz, C. H., *et al.*) 197(1): 1-98
— Source mechanisms of Recent earthquakes in the Hellenic Arc from broadband data
(Liakopoulou, F., *et al.*) 200(1-3): 233-248
— Stress tensor analysis in the Taiwan area from focal mechanisms of earthquakes
(Yeh, Yih-Hsiung, *et al.*) 200(1-3): 267-280
— Strike-slip faulting in continental rifts; examples from Sabukia, East Africa (1928), and other regions
(Doser, Diane Irene, *et al.*) 197(2-4): 213-224
focus: A simplified hypocenter model based on the multicriterion principle for strong earthquakes
(Wang Shengzu) 197(1): 73-87
— Inversion of seismological data using a controlled random search global optimization technique
(Shanker, K., *et al.*) 198(1): 73-80
history: Investigation of historical earthquakes in Europe
(Stucchi, M., *et al.*) 193(1-3): 1-251
magnitude: Minimum size of earthquakes and minimum value of dynamic rupture velocity
(Iio, Yoshihisa) 197(1): 19-25
precursors: A strategy of tectonomagnetic observation for monitoring possible precursors to earthquakes in the western part of the North Anatolian fault zone, Turkey
(Oshiman, N., *et al.*) 193(4): 359-368
— Changes in the magnitude–frequency b-value prior to large ($M > 6.0$) earthquakes in Japan
(Imoto, Masajiro) 193(4): 311-325
— Constraints on the usefulness of gravimetry for detecting precursory crustal deformations
(Lambert, A., *et al.*) 193(4): 369-375
— Earthquake forerunners in a selected area of northern Italy; recent developments in automatic geochemical monitoring
(Martinelli, G., *et al.*) 193(4): 397-410
— Pore-pressure variation as a precursory phenomenon; the need for and a list of supplementary data
(Kumpel, H. J.) 193(4): 377-383
— Well-level variation as a possible seismic precursor; a statistical assessment from Italian historical data
(Albarello, Dario, *et al.*) 193(4): 385-395
prediction: Assessment of earthquake hazard in the Tokyo area, Japan
(Rikitake, T.) 199(1): 121-131
— Earthquake prediction
(Wyss, Max) 193(4): 253-410
— Maps of expected earthquakes based on a combination of parameters
(Sobolev, G. A., *et al.*) 193(4): 255-265
— Multidisciplinary research on fault activity in the western part of the North Anatolian fault zone
(Honkura, Yoshimori, *et al.*) 193(4): 347-357
— Structure of optimal strategies in earthquake prediction
(Molchan, George M.) 193(4): 267-276
— The use of historical data in earthquake prediction; an example from water-level variations and seismicity
(Mucciarelli, Marco, *et al.*) 193(1-3): 247-251
seismic intensity: Macroseismic characteristics of the main earthquakes of the 19th century in southern Italy; a review
(Marturano, A., *et al.*) 193(1-3): 241-245
— Problems regarding the macroseismicity of the Calabro-Sicilian region; a review
(Bottari, A., *et al.*) 193(1-3): 185-194
— The Algerian earthquake of 24 June 1910; a case history
(Ambraseys, N. N., *et al.*) 193(1-3): 205-213
— The 14 January 1810 earthquake in Mor, Hungary; the first isoseismal map
(Stegena, L., *et al.*) 193(1-3): 109-115
— The 1846 Orciano (Pisa) earthquake in published sources and government survey documents
(Albini, P., *et al.*) 193(1-3): 117-130
— The 1887 Ligurian earthquake; a detailed study from contemporary scientific observations
(Ferrari, Graziano) 193(1-3): 131-139
seismic sources: Erratum; Source geometry of historical events retrieved by synthetic isoseismals
(Panza, G. F., *et al.*) 199(1): 136
— Source geometry of historical events retrieved by synthetic isoseismals
(Panza, G. F., *et al.*) 193(1-3): 173-184
seismicity: Seismicity pattern for earthquakes near Bhatsa Reservoir, India
(Srivastava, H. N., *et al.*) 196(1-2): 141-156
seismotectonics: Faulting within the eastern Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 109-139
— Faulting within the western Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 87-107
spectral analysis: Inversion of near-source-broadband accelerograms for the earthquake source-time function
(Chen, Y. T., *et al.*) 197(1): 89-98
seismology—elastic waves
body waves: Body-wave analysis for shallow intraplate earthquakes in the Korean Peninsula and Yellow Sea
(Jun, Myung-Soon) 192(3-4): 345-357
seismology—interior
low-velocity zones: Continental rift structures and dynamics with reference to teleseismic studies of the Rio Grande and East African rifts
(Davis, Paul M.) 197(2-4): 309-325
seismology—mantle
Q: Three-dimensional Q structure beneath the Kanto-Tokai District, Japan
(Sekiguchi, S.) 195(1): 83-104
velocity structure: Deep structure of Fennoscandia from fundamental and higher mode dispersion of Rayleigh waves
(Calcagnile, Gildo) 195(2-4): 139-149
seismology—microearthquakes
focal mechanism: Microseismic activity around the western extension of the 1967 Mudurnu Earthquake Fault
(Iio, Y., *et al.*) 193(4): 327-334
observations: Microearthquake activity in the Suakin Deep, Red Sea, and tectonic implications
(Makris, Jannis, *et al.*) 198(2-4): 411-420
seismology—practice
history: Problems regarding the investigation of the 1790 Oran seismic period
(Lopez Marinas, J. M., *et al.*) 193(1-3): 237-239
— Some glimpses at historical seismology
(Vogt, Jean) 193(1-3): 1-7
— The seismic cataclysm of 29 March 1000; genesis of a mistake
(Alexandre, Pierre) 193(1-3): 45-52

seismology—seismicity
paleoseismicity: An outline of historical seismicity studies in Catalonia
(Olivera, C., *et al.*) 193(1-3): 231-235
— Destructive historical earthquakes in Soviet Armenia
(Nikonov, A. A.) 193(1-3): 225-229
— Earthquakes felt in Trieste from the Middle Ages to the 18th century
(Degasperi, C., *et al.*) 193(1-3): 53-63
— Geological evidence for the last two faulting events on the North Anatolian fault zone in the Mudurnu Valley, western Turkey
(Ikeda, Yasutaka, *et al.*) 193(4): 335-345
— Historical earthquakes in central Italy; case histories in the Marche area
(Monachesi, G., *et al.*) 193(1-3): 95-107
— Investigation of 18th century seismicity in central Italy in the light of the 1741 Fabriano earthquake
(Stucchi, M., *et al.*) 193(1-3): 65-82
— Palaeoseismicity from karst sediments; the "Grotta del Cervo" cave case study (central Italy)
(Postpischl, D., *et al.*) 193(1-3): 33-44
— Palaeoseismology; review of the state-of-the-art
(Vittori, Eutizio, *et al.*) 193(1-3): 9-32
— The effects of the November 1, 1755 "Lisbon" earthquake in Morocco
(Levret, A.) 193(1-3): 83-94
periodicity: Periodicity in seismicity; examination of four catalogs
(Lindholm, Conrad D., *et al.*) 191(1-2): 155-164
seismic zoning: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183
seismotectonics: Analysis of seismotectonic processes in subduction zones from the standpoint of a keyboard model of great earthquakes
(Lobkovsky, L. I., *et al.*) 199(2-4): 211-236
spatial variations: Spatial variations in seismicity on the eastern Chinese mainland
(Fu Zhengxiang) 193(4): 291-298
statistical analysis: Seismic hazard evaluation for specific seismic regions of the world
(Tsapanos, Theodoros M., *et al.*) 194(1-2): 153-169
time variations: Seismicity rate variations and systematic changes in magnitudes in teleseismic catalogs
(Habermann, Ray E.) 193(4): 277-289
seismology—theoretical studies
earthquakes: Probabilistic assessment of earthquake hazard in Vietnam based on seismotectonic regionalization
(Nguyen Hong Phuong) 198(1): 81-93
seismic intensity: Macroseismic intensity versus epicentral distances; the case of central Italy
(Grandori, G., *et al.*) 193(1-3): 165-171
shear zones *see under* effects *under* faults
slope stability *see also* geomorphology
soil mechanics *see also* rock mechanics
soil mechanics—liquefaction
case studies: Soil liquefaction; case histories in Italy
(Berardi, R., *et al.*) 193(1-3): 141-164
solution features *see under* geomorphology
South Africa—petrology
metamorphism: Aspects of the dynamic and thermal metamorphic history of the Vredefort cryptoexplosion structure; implications for its origin
(Hart, R. J., *et al.*) 192(3-4): 313-331
South Africa—structural geology
tectonics: The geotectonic evolution of the eastern part of the Namaqualand metamorphic province, South Africa
(Slabbert, M. J., *et al.*) 191(3-4): 440-441
South Africa—tectonophysics
crust: A synthesis of the structural geology of a major tectonic boundary between a 1000 m.y. mobile belt and a 3000 m.y. craton
(Van Bever Donker, J. M.) 196(3-4): 359-370
— Susceptibility and Koenigsberger ratio of the oceanic crust deduced from magnetic reversals southeast of the Agulhas Bank
(Day, R. W., *et al.*) 192(1-2): 97-101
South America *see also* Brazil
South America—tectonophysics
crust: Lithospheric magnetic property contrasts within the South American Plate derived from damped least-squares inversion of satellite magnetic data
(Ravat, D. N., *et al.*) 192(1-2): 159-168
South China Sea—tectonophysics
plate tectonics: Meso–Cenozoic taphrogeny and dispersion in the continental margin of Southeast China and adjacent seas
(Qiu Yuanxi, *et al.*) 197(2-4): 257-269
South-West Africa *see* Namibia
Southern Hemisphere *see also* Africa; Antarctica; Atlantic Ocean; Indian Ocean; Pacific Ocean; South America
Southern U.S.—tectonophysics
crust: A COCORP deep reflection profile across the buried Reelfoot Rift, south-central United States
(Nelson, K. D., *et al.*) 197(2-4): 271-293
Southwestern U.S. *see also* Arizona; New Mexico
Soviet Union *see* USSR
Spain—geophysical surveys
magnetic surveys: Interpretation of magnetic anomalies in the volcanic area of northeastern Spain
(Zeyen, H. J., *et al.*) 192(1-2): 201-210
Spain—petrology
metamorphism: Opposite P, T, t paths of Hercynian metamorphism between the upper units of the Cabo Ortegal Complex and their substratum (northwest of the Iberian Massif)
(Arenas, R.) 191(3-4): 347-364
— Structural and metamorphic evolution of the Almaden de la Plata Core (Seville, Spain) in relation to syn-metamorphic shear between the Ossa-Morena and South Portuguese zones of the Iberian Variscan fold belt
(Abalos Villaro, B., *et al.*) 191(3-4): 365-387
Spain—seismology
earthquakes: An outline of historical seismicity studies in Catalonia
(Olivera, C., *et al.*) 193(1-3): 231-235
Spain—structural geology
faults: Extensional tectonics of the Toledo ductile–brittle shear zone, central Iberian Massif
(Hernandez Enrile, J. L.) 191(3-4): 311-324
— Mid-crustal detachment in the Betic System of Southeast Spain
(Banks, Chris J., *et al.*) 191(3-4): 275-289
folds: Internal structure of the Adra Nappe (Alpujarride Complex, Betics, Spain)
(Cuevas, Julia) 200(1-3): 199-212
orogeny: Continuous deformation, ductile thrusting and backfolding of cover and basement in the Sierra de Guadarrama, Hercynian Orogen of central Spain
(Macaya, J., *et al.*) 191(3-4): 291-309
— Late Hercynian extensional and transcurrent tectonics in central Iberia
(Doblas, Miguel) 191(3-4): 325-334

— Tectonostratigraphic terranes and the geodynamic evolution of the Iberian Variscan fold belt
(Ribeiro, A., *et al.*) 191(3-4): 438-439
— The Cantabrian Zone; an interpretation for an arcuate foreland thrust belt
(Perez-Estaun, A., *et al.*) 191(3-4): 435
tectonics: Persistent basement wrenching as controlling mechanism of Variscan thin-skinned thrusting and sedimentation, Cantabrian Mountains, Spain [discussion and reply]
(Alonso, J. L., *et al.*) 194(1-2): 171-182

Spain—tectonophysics
crust: Crustal thickening and deformation sequence in the footwall to the suture of the Variscan Belt of Northwest Spain
(Perez-Estaun, A., *et al.*) 191(3-4): 243-253
plate tectonics: Cadomian subduction/collision and Variscan transpression in the Badajoz–Cordoba shear belt, Southwest Spain
(Abalos, B., *et al.*) 199(1): 51-72
— Flake tectonics in the Northwest Iberian Variscides
(Ribeiro, A., *et al.*) 191(3-4): 437
— Plate-tectonic constraints derived from small-scale structures and P, T, t evolutions; a case study from the Betic Cordilleras (Southeast Spain)
(Bakker, H. E., *et al.*) 191(3-4): 411

springs *see also* ground water

strontium—isotopes
Sr-87/Sr-86: A tectonic model of the Antarctic Gondwana margin with implications for southeastern Australia; isotopic and geochemical evidence
(Borg, Scott G., *et al.*) 196(3-4): 339-358
— High-Ti continental tholeiites from the Aznam Trough, northwestern Saudi Arabia; evidence of "abortive" rifting in the "embryonic" stage of Red Sea opening
(Suayah, Ismail B., *et al.*) 191(1-2): 75-87
— Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
— Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201

structural analysis *see also* folds; foliation; lineation

structural analysis—faults
fault zones: Strains and structures associated with a terrane bounding stretching fault; the Melones fault zone, central Sierra Nevada, California
(Paterson, Scott R., *et al.*) 194(1-2): 69-90
shear zones: Extensional tectonics of the Toledo ductile–brittle shear zone, central Iberian Massif
(Hernandez Enrile, J. L.) 191(3-4): 311-324
— Geometry of a middle Proterozoic extensional decollement in northeastern Australia
(Holcombe, R. J., *et al.*) 191(3-4): 255-274

structural analysis—folds
polyphase processes: The overprint of the Alpine tectonometamorphic evolution on the Hercynian Orogen; an example from the Apuane Alps (Northern Apennines, Italy)
(Conti, P., *et al.*) 191(3-4): 335-346

structural analysis—fractures
fractals: Fractal analysis of fracturing in two African regions, from satellite imagery to ground scale
(Vignes-Adler, Michele, *et al.*) 196(1-2): 69-86

structural analysis—interpretation
cryptoexplosion features: Aspects of the dynamic and thermal metamorphic history of the Vredefort cryptoexplosion structure; implications for its origin
(Hart, R. J., *et al.*) 192(3-4): 313-331
drainage patterns: Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin
(Deffontaines, B., *et al.*) 194(3): 237-263
geodynamics: Post-Pan-African tectonic evolution of South Malawi in relation to the Karroo and Recent East African Rift systems
(Castaing, C.) 191(1-2): 55-73
orogenic belts: Relationships between kinematics of arc–continent collision and kinematics of thrust faults, folds, shear zones, and foliations in the Nevadan Orogen, northern Sierra Nevada, California
(Edelman, Steven H.) 191(3-4): 223-236

structural analysis—lineation
interpretation: Ductile deformation and Miocene nappe-stacking in Taiwan related to motion of the Philippine Sea Plate
(Faure, M., *et al.*) 198(1): 95-105

structural analysis—preferred orientation
plagioclase: The effect of plagioclase textures on velocity anisotropy and shear wave splitting at deeper crustal levels
(Siegesmund, S., *et al.*) 191(1-2): 147-154
sheet silicates: Determination of March strain from phyllosilicate preferred orientation; a semi-numerical method
(Chen, Richard T., *et al.*) 200(1-3): 173-185

structural geology—classification
faults: Proposal for classification of fault activity in an intraplate collision setting; definitions and examples
(Bles, J. L., *et al.*) 194(3): 279-293

structural geology—symposia
deformation: Deformation and plate tectonics
(Perez-Estaun, A., *et al.*) 191(3-4): 185-446
neotectonics: Neotectonics
(Fourniguet, J., *et al.*) 194(3): 197-305

structural petrology *see* structural analysis

Sudan—petrology
intrusions: Granite magmatism in the East Saharan Craton initiated by arc-continent collision in the Nubian Shield
(Harms, U.) 191(3-4): 424

Sudan—tectonophysics
crust: Contrasting structural styles of the eastern and western margins of the southern Red Sea; the 1988 SONNE experiment
(Egloff, Frank, *et al.*) 198(2-4): 329-353

Sweden—geophysical surveys
seismic surveys: Deep crustal seismic reflection profiling across two major tectonic zones in southern Sweden
(Dahl-Jensen, T., *et al.*) 195(2-4): 209-240

Sweden—tectonophysics
crust: An estimate of the stress tensor in Sweden using earthquake focal mechanisms
(Henderson, Jeremy) 192(3-4): 231-244
— Deep crustal seismic reflection profiling across two major tectonic zones in southern Sweden
(Dahl-Jensen, T., *et al.*) 195(2-4): 209-240

Switzerland—structural geology
faults: Mesoscopic faults in the Bregaglia (Bergell) Massif, Central Alps
(Passerini, P., *et al.*) 198(1): 53-72

Switzerland—tectonophysics
mantle: Some structural features of the Alpine lithospheric root
(Viel, L., *et al.*) 195(2-4): 421-436
symposia—seismology
earthquakes: Earthquake prediction
(Wyss, Max) 193(4): 253-410
— Investigation of historical earthquakes in Europe
(Stucchi, M., *et al.*) 193(1-3): 1-251
— Modelling the earthquake source
(Scholz, C. H., *et al.*) 197(1): 1-98
symposia—structural geology
deformation: Deformation and plate tectonics
(Perez-Estaun, A., *et al.*) 191(3-4): 185-446
— Deformation and plate tectonics; introduction
(Coward, Michael P., *et al.*) 191(3-4): 185-188
faults: World rift systems
(Gangi, A. F.) 197(2-4): 99-389
neotectonics: Neotectonics
(Fourniguet, J., *et al.*) 194(3): 197-305
symposia—tectonophysics
crust: The European Geotraverse, Part 7
(Freeman, R., *et al.*) 195(2-4): 105-446
heat flow: Forward and inverse techniques in geothermal modelling
(Cermak, Vladimir, *et al.*) 194(4): 307-428
paleomagnetism: Magnetic anomalies; land and sea
(Wasilewski, Peter J., *et al.*) 192(1-2): 1-230
plate tectonics: Accretionary tectonics and composite continents
(Hatcher, Robert D., Jr., *et al.*) 196(3-4): 211-411
sea-floor spreading: Red Sea; birth and early history of a new oceanic basin
(Makris, Jannis, *et al.*) 198(2-4): 129-466
Taiwan—seismology
earthquakes: Stress tensor analysis in the Taiwan area from focal mechanisms of earthquakes
(Yeh, Yih-Hsiung, *et al.*) 200(1-3): 267-280
Taiwan—structural geology
deformation: Ductile deformation and Miocene nappe-stacking in Taiwan related to motion of the Philippine Sea Plate
(Faure, M., *et al.*) 198(1): 95-105
Taiwan—tectonophysics
crust: Stress tensor analysis in the Taiwan area from focal mechanisms of earthquakes
(Yeh, Yih-Hsiung, *et al.*) 200(1-3): 267-280
plate tectonics: Rotations in the northeastern collision belt of Taiwan; preliminary results from paleomagnetism
(Lee, Teh-Quei, *et al.*) 199(1): 109-120
tectonics *see also* faults; folds; orogeny; plate tectonics; salt tectonics; structural analysis; *see also under* structural geology *under* China; South Africa; Spain; Tunisia; USSR
tectonophysics—experimental studies
plumes: Entrainment in compositionally buoyant plumes
(Neavel, Kenneth E., *et al.*) 200(1-3): 1-15
sea-floor spreading: A formation and evolution of overlapping spreading centers (constrained on the basis of physical modelling)
(Shemenda, Alexander I., *et al.*) 199(2-4): 389-404
tectonophysics—symposia
heat flow: Forward and inverse techniques in geothermal modelling
(Cermak, Vladimir, *et al.*) 194(4): 307-428
paleomagnetism: Magnetic anomalies; land and sea
(Wasilewski, Peter J., *et al.*) 192(1-2): 1-230
plate tectonics: Accretionary tectonics and composite continents
(Hatcher, Robert D., Jr., *et al.*) 196(3-4): 211-411
— Deformation and plate tectonics
(Perez-Estaun, A., *et al.*) 191(3-4): 185-446
rifting: World rift systems
(Gangi, A. F.) 197(2-4): 99-389
tectonophysics—theoretical studies
plate tectonics: Planetary evolution and global tectonics
(Monin, A. S.) 199(2-4): 149-164
— Ridge push and associated plate interior stress in normal and hot spot regions
(Bott, M. H. P.) 200(1-3): 17-32
terraces *see under* fluvial features *under* geomorphology
terrestrial crust *see* crust
terrestrial mantle *see* mantle
Tertiary *see also under* geochronology *under* Saudi Arabia; *see also under* stratigraphy *under* Turkey
Tethys *see under* continental drift
theoretical studies *see under* mechanism *under* salt tectonics; *see under* deformation; seismology; tectonophysics
thrust faults *see under* displacements *under* faults
trace elements *see under* geochemistry *under* Germany; Greece; lava; New Mexico; Saudi Arabia
Tunisia—geophysical surveys
seismic surveys: The post-Triassic sedimentary cover of Tunisia; seismic sequences and structure
(Bobier, C., *et al.*) 195(2-4): 371-410
Tunisia—stratigraphy
Cenozoic: The post-Triassic sedimentary cover of Tunisia; seismic sequences and structure
(Bobier, C., *et al.*) 195(2-4): 371-410
Mesozoic: The post-Triassic sedimentary cover of Tunisia; seismic sequences and structure
(Bobier, C., *et al.*) 195(2-4): 371-410
Tunisia—structural geology
tectonics: Structures and tectonics of Tunisia
(Burollet, P. F.) 195(2-4): 359-369
Turkey—geochronology
Holocene: Geological evidence for the last two faulting events on the North Anatolian fault zone in the Mudurnu Valley, western Turkey
(Ikeda, Yasutaka, *et al.*) 193(4): 335-345
Turkey—geophysical surveys
magnetic surveys: A strategy of tectonomagnetic observation for monitoring possible precursors to earthquakes in the western part of the North Anatolian fault zone, Turkey
(Oshiman, N., *et al.*) 193(4): 359-368
Turkey—seismology
earthquakes: A strategy of tectonomagnetic observation for monitoring possible precursors to earthquakes in the western part of the North Anatolian fault zone, Turkey
(Oshiman, N., *et al.*) 193(4): 359-368
— Microseismic activity around the western extension of the 1967 Mudurnu Earthquake Fault
(Iio, Y., *et al.*) 193(4): 327-334
Turkey—stratigraphy
Tertiary: Tertiary evolution of the Sivas Basin, central Turkey
(Cater, J. M. L., *et al.*) 195(1): 29-46
Turkey—structural geology
neotectonics: Multidisciplinary research on fault activity in the western part of the North Anatolian fault zone
(Honkura, Yoshimori, *et al.*) 193(4): 347-357
Turkey—tectonophysics
plate tectonics: Paleomagnetic constraints on the tectonic evolution of the Sakarya Continent, northwestern Anatolia [discussion and reply]
(Saribudak, Mustafa, *et al.*) 200(1-3): 317-323

Tyrrhenian Sea—tectonophysics
mantle: Upper mantle properties of the Tuscan–Tyrrhenian area; a framework for its Recent tectonic evolution
(Della Vedova, B., *et al.*) 195(2-4): 311-318

underground water *see* ground water

United Kingdom *see also* Wales

United States *see also* Alaska; Arizona; California; Georgia; Idaho; New Mexico; Oregon; Pennsylvania; Southern U.S.; Washington

USSR—petrology
magmas: Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317

USSR—seismology
earthquakes: Destructive historical earthquakes in Soviet Armenia
(Nikonov, A. A.) 193(1-3): 225-229
— Faulting within the eastern Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 109-139
— Faulting within the western Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 87-107
— Maps of expected earthquakes based on a combination of parameters
(Sobolev, G. A., *et al.*) 193(4): 255-265
maps: Maps of expected earthquakes based on a combination of parameters
(Sobolev, G. A., *et al.*) 193(4): 255-265

USSR—structural geology
neotectonics: Faulting within the eastern Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 109-139
— Faulting within the western Baikal Rift as characterized by earthquake studies
(Doser, Diane Irene) 196(1-2): 87-107
tectonics: Tectonics of the Verkhoyansk–Kolyma Mesozoides in the context of plate tectonics
(Parfenov, L. M.) 199(2-4): 319-342

USSR—tectonophysics
crust: Crustal extension in the Baikal rift zone
(Zorin, Yu. A., *et al.*) 198(1): 117-121
— On the mechanism of graben formation
(Artyushkov, Eugene V., *et al.*) 197(2-4): 99-115
— Tectonic nappes and horizontal layering of the Earth's crust in the Mediterranean Belt (Carpathians, Balkanides and Caucasus)
(Gamkrelidze, I. P.) 196(3-4): 385-396
plate tectonics: Mobilism and plate tectonics in the USSR
(Khain, V. E.) 199(2-4): 137-148
— Tectonics of the Verkhoyansk–Kolyma Mesozoides in the context of plate tectonics
(Parfenov, L. M.) 199(2-4): 319-342
— The achievements of plate tectonics in the USSR
(Zonenshain, L. P.) 199(2-4): 137-404
— The Komandorsky Basin as a product of spreading behind a transform plate boundary
(Baranov, B. V., *et al.*) 199(2-4): 237-269

USSR—volcanology
Kuril Islands: Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287

Victoria—structural geology
orogeny: Palaeozoic back-arc deformation, SE Australia
(Gray, David R., *et al.*) 191(3-4): 422-423

Vietnam—seismology
earthquakes: Probabilistic assessment of earthquake hazard in Vietnam based on seismotectonic regionalization
(Nguyen Hong Phuong) 198(1): 81-93

volcanic rocks *see under* igneous rocks

volcanism *see under* volcanology

volcanology—volcanism
calderas: The Neogene ash-flow caldera of A'ithayn; an eruptive centre upon the Trap Series in central North Yemen
(Heyckendorf, K., *et al.*) 198(2-4): 223-238
Cenozoic: Interpretation of magnetic anomalies in the volcanic area of northeastern Spain
(Zeyen, H. J., *et al.*) 192(1-2): 201-210
evolution: Early Mesozoic oceanic subduction-related volcanic rocks, Pindos Basin, Greece
(Pe-Piper, Georgia, *et al.*) 192(3-4): 273-292
— Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202
hot spots: Hot-field tectonics
(Zonenshain, L. P., *et al.*) 199(2-4): 165-192
island arcs: Kurile island-arc volcanism; structural and petrological aspects
(Avdeiko, G. P., *et al.*) 199(2-4): 271-287
— Magmatism of the westernmost (Komandorsky) segment of the Aleutian island arc
(Tsvetkov, A. A.) 199(2-4): 289-317
rift zones: A comparative study of the Rio Grande and Kenya rifts
(Keller, G. Randy, *et al.*) 197(2-4): 355-371
— A preliminary description of the Gan-Hang failed rift, southeastern China
(Goodell, P. C., *et al.*) 197(2-4): 245-255
— Backarc extension versus continental breakup; petrological aspects for active rifting
(Tatsumi, Yoshiyuki, *et al.*) 197(2-4): 127-137
— Middle to late Cenozoic magmatism of the southeastern Colorado Plateau and central Rio Grande Rift (New Mexico and Arizona, U.S.A.); a model for continental rifting
(Baldridge, W. Scott, *et al.*) 197(2-4): 327-354
— Miocene magmatism of Sinai related to the opening of the Red Sea
(Baldridge, W. Scott, *et al.*) 197(2-4): 181-201
— The position of continental flood basalts in rift zones and its bearing on models of rifting
(Kazmin, V. G.) 199(2-4): 375-387
volcanic fields: Age and petrology of the Tertiary As Sarat volcanic field, southwestern Saudi Arabia
(du Bray, Edward A., *et al.*) 198(2-4): 155-180

Wales—petrology
metamorphic rocks: A study of colour changes in purple–green slate by petrological and rock-magnetic methods
(Borradaile, Graham John, *et al.*) 200(1-3): 157-172

Wales—structural geology
deformation: Determination of March strain from phyllosilicate preferred orientation; a semi-numerical method
(Chen, Richard T., *et al.*) 200(1-3): 173-185
— On the origin of the magnetic fabric in purple Cambrian slates of North Wales
(Jackson, Mike, *et al.*) 194(1-2): 49-58

Washington—geophysical surveys
geodesy: Horizontal deformation in the Cascadia subduction zone as derived from serendipitous geodetic data
(Snay, Richard A., *et al.*) 194(1-2): 59-67

Washington—tectonophysics
crust: Deformations of the Juan de Fuca–North American plate boundary
(Yokokura, T., *et al.*) 191(3-4): 446

water *see also* ground water

well-logging—temperature logging
interpretation: Heat flow on the southern Colorado Plateau
(Minier, Jeffrie, *et al.*) 200(1-3): 51-66

West Indies *see also* Barbados; Greater Antilles; Haiti

Western Australia—tectonophysics
crust: Heat flow modelling; a generalized two-dimensional diffusive and convective numerical model for the Exmouth Plateau, offshore Northwest Australia
(Swift, Michael G.) 194(4): 409-426

Western Hemisphere *see also* Atlantic Ocean; North America; Pacific Ocean; South America

Western U.S. *see also* Alaska; California; Idaho; Oregon; Washington

xenoliths *see under* inclusions

Yellow Sea—seismology
earthquakes: Body-wave analysis for shallow intraplate earthquakes in the Korean Peninsula and Yellow Sea
(Jun, Myung-Soon) 192(3-4): 345-357

Yemen—petrology
intrusions: Structure of Yemeni Miocene dike swarms, and emplacement of coeval granite plutons
(Mohr, Paul) 198(2-4): 203-221
magmas: Magmatism of the eastern Red Sea margin in the northern part of Yemen from Oligocene to present
(Manetti, Piero, *et al.*) 198(2-4): 181-202
volcanism: The Neogene ash-flow caldera of A'ithayn; an eruptive centre upon the Trap Series in central North Yemen
(Heyckendorf, K., *et al.*) 198(2-4): 223-238

Yemen—tectonophysics
crust: Contrasting structural styles of the eastern and western margins of the southern Red Sea; the 1988 SONNE experiment
(Egloff, Frank, *et al.*) 198(2-4): 329-353

Yugoslavia—seismology
seismicity: Seismic hazard assessment for the main seismogenic zones in the Eastern Alps
(Slejko, Dario, *et al.*) 191(1-2): 165-183

Zaire—geomorphology
fluvial features: Principles of drainage basin analysis from multisource data; application to the structural analysis of the Zaire Basin
(Deffontaines, B., *et al.*) 194(3): 237-263

Tectonophysics, 200 (1991) 377–422

1320 **Wasilewski, P. J.; and Hood, P. J. (editors).** Magnetic anomalies; land and sea 192(1-2): 1-230

1321 **Wei Siyu; and Deng Xiao-yue.** Geothermal activity, geophysical anomalies and the geothermal state of the crust and upper mantle in the Yarlung Zangbo river zone 159(3-4): 247-254

1322 **Weijermars, R.** Convection experiments in high Prandtl number silicones; Part 1, Rheology, equipment, nomograms and dynamic scaling of stress- and temperature-dependent convection in a centrifuge 154(1-2): 71-96

1323 **Weijermars, R.** Convection experiments in high Prandtl number silicones; Part 2, Deformation, displacement and mixing in the Earth's mantle 154(1-2): 97-123

1324 **Wells, R. E.** Origin of the oceanic basalt basement of the Solomon Islands arc and its relationship to the Ontong Java Plateau; insights from Cenozoic plate motion models 165(1-4): 219-235

1325 **Weng Shijie; Chen Hushen; Zhou Xueqing;** *et al.* Deep seismic probing of continental crust in the lower Yangtze region, Eastern China 173(1-4): 297-305

1326 **Wever, T.** The Conrad discontinuity and the top of the reflective lower crust; do they coincide? 157(1-3): 39-58

1327 **Wever, T.; Meissner, R.; Sadowiak, P.;** *et al.* Comparative investigations of continental reflectivity 173(1-4): 199-206

1328 **Wever, T.; Meissner, R.; Sadowiak, P.;** *et al.* Deep reflection seismic data along the central part of the European Geotraverse in Germany; a review 176(1-2): 87-101

1329 **Wever, T.; and Sadowiak, P.** A relationship between crustal thickness and mean crustal velocity 170(1-2): 159-163

1330 **Whitehouse, M. J.** Sm-Nd evidence for diachronous crustal accretion in the Lewisian Complex of Northwest Scotland 161(3-4): 245-256

1331 **Wilkerson, M. S.; and Marshak, S.** Factors controlling slip-lineation orientation on thrust-fault planes 196(1-2): 203-208

1332 **Wilks, K. R.; and Carter, N. L.** Rheology of some continental lower crustal rocks 182(1-2): 57-77

1333 **Willcox, J. B.; and Stagg, H. M. J.** Australia's southern margin; a product of oblique extension 173(1-4): 269-281

1334 **Williams, H.; Hoffman, P. F.; Lewry, J. F.;** *et al.* Anatomy of North America; thematic geologic portrayals of the continent 187(1-3): 117-134

1335 **Williams, P. F.; and Urai, J. L.** Curved vein fibres; an alternative explanation 158(1-4): 311-333

1336 **Wilshire, H. G.; and Kirby, S. H.** Dikes, joints, and faults in the upper mantle 161(1-2): 23-31

1337 **Wilson, J. T.** Currents in the mantle and the geology of continents 187(1-3): 61-67

1338 **Wimmenauer, W.; and Stenger, R.** Acid and intermediate HP metamorphic rocks in the Schwarzwald (Federal Republic of Germany) 157(1-3): 109-116

1339 **Windley, B. F.** Early Proterozoic collision tectonics, and rapakivi granites as intrusions in an extensional thrust-thickened crust; the Ketilidian Orogen, South Greenland 195(1): 1-10

1340 **Wolf, D.; and Morner, N.** Glacial isostasy and long-term crustal movements in Fennoscandia with respect to lithospheric and asthenospheric processes and properties [discussion and reply] 195(2-4): 443-446

1341 **Wolter, K. E.; and Berckhemer, H.** Estimation of in situ stresses by evaluation of time-dependent strain recovery of KTB drill cores [abstr.] 178(2-4): 255-257

1342 **Wong, T.; and Zhao, Y.** Effects of load point velocity on frictional instability behavior 175(1-3): 177-195

1343 **Woodward, N. B.; and Rutherford, E. , Jr.** Structural lithic units in external orogenic zones 158(1-4): 247-267

1344 **Wright, C.; Barton, T.; Goleby, B. R.;** *et al.* The interpretation of expanding spread reflection profiles; examples from central and eastern Australia 173(1-4): 73-82

1345 **Wright, C.; Goleby, B. R.; Collins, C. D. N.;** *et al.* Deep seismic profiling in central Australia 173(1-4): 247-256

1346 **Wright, J. A.; and Hall, J.** Deep seismic profiling in the Nosop Basin, Botswana; cratons, mobile belts and sedimentary basins 173(1-4): 333-343

1347 **Wu, F.; and Van der Voo, R.** Paleomagnetism of Middle-Late Triassic plutons in southern Maine 156(1-2): 51-58

1348 **Wu, S.** Strain partitioning and deformation mode analysis of the normal faults at Red Mountain, Birmingham, Alabama 170(3-4): 171-182

1349 **Wu, S.; and Groshong, R. H. , Jr.** Strain analysis using quartz deformation bands 190(2-4): 269-282

1350 **Wyss, M. (editor).** Earthquake prediction 193(4): 253-410

1351 **Xu Shutong; and Ji Shouyuan.** Biotite percussion figures in naturally deformed mylonites 190(2-4): 373-380

1352 **Yamamoto, J.; and Mitchell, B. J.** Rupture mechanics of complex earthquakes in southern Mexico 154(1-2): 25-40

1353 **Yamano, M.; Uyeda, S.; Foucher, J.;** *et al.* Heat flow anomaly in the middle Okinawa Trough 159(3-4): 307-318

1354 **Yamazaki, T.; and Okamura, Y.** Subducting seamounts and deformation of overriding forearc wedges around Japan 160(1-4): 207-229

1355 **Yarwood, D. R.; and Doser, D. I.** Deflection of oceanic transform motion at a continental margin as deduced from waveform inversion of the 1939 Accra, Ghana earthquake 172(3-4): 341-349

1356 **Yeh, Y.; Barrier, E.; Lin, C.;** *et al.* Stress tensor analysis in the Taiwan area from focal mechanisms of earthquakes 200(1-3): 267-280

1357 **Yokokura, T.; Nakiboglu, S. M.; and Wu, P.** Deformations of the Juan de Fuca–North American plate boundary [abstr.] 191(3-4): 446

1358 **Yoshida, A.** Characteristic space-time patterns in seismic activity in the Northwest Chubu District of Honshu Island, Japan, and the 1984 Nagano-ken Seibu earthquake 167(2-4): 93-102

1359 **Yoshioka, S.; Hashimoto, M.; and Hirahara, K.** Displacement fields due to the 1946 Nankaido earthquake in a laterally inhomogeneous structure with the subducting Philippine Sea Plate; a three-dimensional finite element approach 159(1-2): 121-136

1360 **Young, R. A.; Stewart, S. C.; Seman, M. R.;** *et al.* Fault-plane reflection processing and 3D display; the Darling Fault, Western Australia 173(1-4): 107-117

1361 **Yu, H.** The Pearl River Mouth Basin; a rift basin and its geodynamic relationship with the southeastern Eurasian margin 183(1-4): 177-186

1362 **Yu, S.; Jackson, D. D.; Yu, G.;** *et al.* Dislocation model for crustal deformation in the Longitudinal Valley area, eastern Taiwan 183(1-4): 97-109

1363 **Zadro, M.; Ernst, T.; Jankowski, J.;** *et al.* Magneto-telluric recordings from the Friuli seismic zone, Northeast Italy 180(2-4): 303-308

1364 **Zavyalov, A. D.; and Sobolev, G. A.** Analogy in precursors of dynamic events at different scales 152(3-4): 277-282

1365 **Zeck, H. P.; Albat, F.; Hansen, B. T.;** *et al.* A 21 ± 2 Ma age for the termination of the ductile Alpine deformation in the internal zone of the Betic Cordilleras, South Spain 169(1-3): 215-220

1366 **Zehnder, C. M.; Mutter, J. C.; and Buhl, P.** Deep seismic and geochemical constraints on the nature of rift-induced magmatism during breakup of the North Atlantic 173(1-4): 545-565

1367 **Zeis, S.; Gajewski, D.; and Prodehl, C.** Crustal structure of southern Germany from seismic refraction data 176(1-2): 59-86

1368 **Zeyen, H. J.; Banda, E.; and Klingele, E.** Interpretation of magnetic anomalies in the volcanic area of northeastern Spain 192(1-2): 201-210

1369 **Zhang, D.; and Lutz, T. M.** Structural control of igneous complexes and kimberlites; a new statistical method 159(1-2): 137-148

1370 **Zhao Xixi; Coe, R. S.; Zhou Yaoxiu;** *et al.* Erratum; New paleomagnetic results from Northern China; collision and suturing with Siberia and Kazakhstan 186(3-4): 390

1371 **Zhao Zhixin; Oike, K.; Matsumura, K.;** *et al.* Stress field in the continental part of China derived from temporal variations of seismic activity 178(2-4): 357-372

1372 **Zhao Zhong Yan; Wang Yi; and Liu Xiao Han.** Fractal analysis applied to cataclastic rocks 178(2-4): 373-377

Zhao • Zuo Guochao

1373 **Zhao, D.; Horiuchi, S.; and Hasegawa, A.** 3-D seismic velocity structure of the crust and the uppermost mantle in the northeastern Japan Arc 181(1-4): 135-149

1374 **Zhao, X.; Coe, R. S.; Zhou Yaoxiu;** *et al.* New paleomagnetic results from Northern China; collision and suturing with Siberia and Kazakhstan 181(1-4): 43-81

1375 **Zhao, Z. Y.; and Windley, B. F.** Cenozoic tectonic extension and inversion of the Jizhong Basin, Hebei, Northern China 185(1-2): 83-89

1376 **Zhu, P.** A tectonic implication of the seismicity in the Central Metasedimentary Belt of the Grenville Province 186(1-2): 43-58

1377 **Zingg, A.; Handy, M. R.; Hunziker, J. C.;** *et al.* Tectonometamorphic history of the Ivrea Zone and its relationship to the crustal evolution of the Southern Alps 182(1-2): 169-192

1378 **Zonenshain, L. P. (editor).** The achievements of plate tectonics in the USSR 199(2-4): 137-404

1379 **Zonenshain, L. P.; Kuz'min, M. I.; and Bocharova, N. Y.** Hot-field tectonics 199(2-4): 165-192

1380 **Zonenshain, L. P.; Kuz'min, M. I.; Lisitsin, A. P.;** *et al.* Tectonics of the Mid-Atlantic rift valley between the TAG and MARK areas (26-24°N); evidence for vertical tectonism 159(1-2): 1-23

1381 **Zorin, Y. A.** Maximum thickness of the lithosphere and heat flow of continents 164(2-4): 117-120

1382 **Zorin, Y. A.; and Cordell, L.** Crustal extension in the Baikal rift zone 198(1): 117-121

1383 **Zorin, Y. A.; Kozhevnikov, V. M.; Novoselova, M. R.;** *et al.* Thickness of the lithosphere beneath the Baikal rift zone and adjacent regions 168(4): 327-337

1384 **Zorpi, M. J.; Coulon, C.; Orsini, J. B.;** *et al.* Magma mingling, zoning and emplacement in calc-alkaline granitoid plutons 157(4): 315-329

1385 **Zuchiewicz, W.** Neotectonics versus gravity and crustal thickness; a case study of the Polish Flysch Carpathians 163(3-4): 277-284

1386 **Zuo Guochao; Zhang Shuling; He Guoqi;** *et al.* Plate tectonic characteristics during the early Paleozoic in Beishan near the Sino-Mongolian border region, China 188(3-4): 385-392
